- Level the chair by twisting the round pad on the underside of the feet.

Step 5

Assemble the Desk

Height Adjustments

There are two options to adjust the height of the desk and the chair:

Option 1. Remove the 2 bolts from the inside of each leg of the desk and chair (2 per leg for a total of 8 screws) and move the desk/chair to the desired height using the instructions below. Replace the bolts to fix the height of the desk and chair so that it cannot be accidentally moved to a different height without the help of an adult.

Option 2. Remove the 2 screws from each leg of the desk and chair and move the desk/chair to the desired height using the instructions below. Keep the bolts in a safe place for future use, but leave them uninstalled so that the chair and desk can be easily moved to any height as needed.

RAISING THE DESK/CHAIR

Stabilize the desk/chair by placing your foot on the crossbar and lift it to the desired height using both hands as shown.

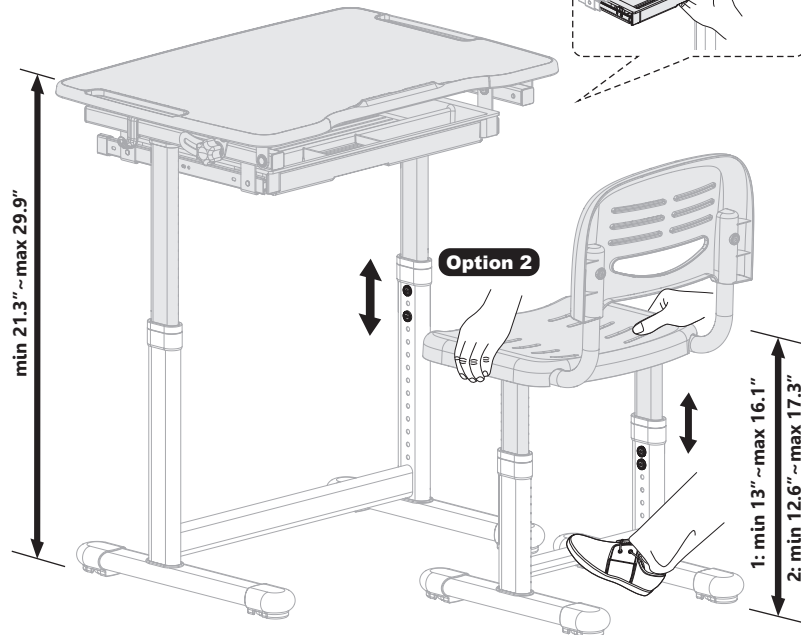

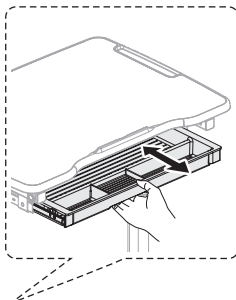

LOWERING THE DESK/CHAIR

Stabilize the desk/chair by placing your foot on the crossbar. Lift it to the highest position using both hands, then lower it to the default position. Lift it again to the desired height.

WARNING:

To avoid possible product damage or personal injury, always keep a firm hold on the desk/chair during height adjustments. Slowly release your hands when the desk/chair reaches and stays at your desired height.
