DIMENSIONS & WEIGHT CAPACITY

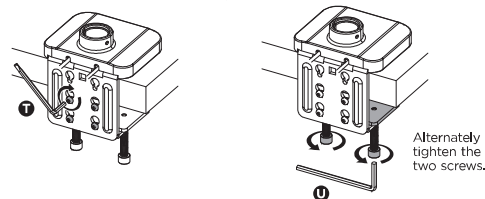

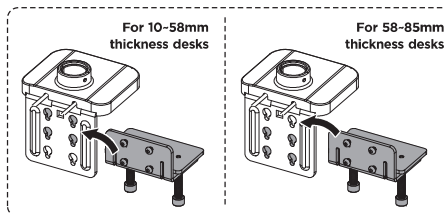

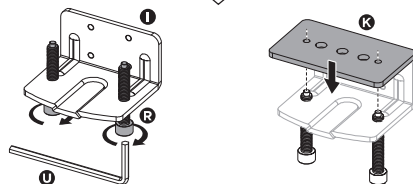

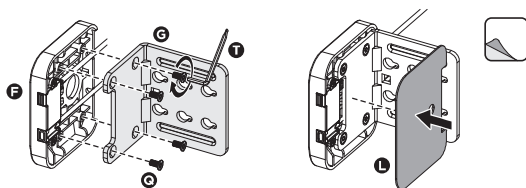

Rated weight capacity is 19.8lbs/9kgs for each screen. **Caution:** Ensure all mounting surfaces are capable of holding the weight of your mount. **DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY. SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!**

Step 1a

Clamp Installation for 10-85mm thickness desks

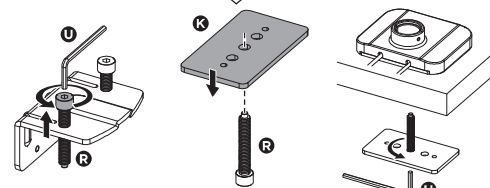

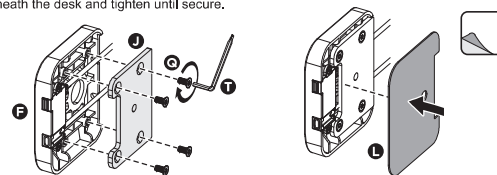

- Connect Clamp L-Bracket (#G) to the Base (#F) using Bolts (#Q) and tighten until secure.
- Peel off the backing from Adhesive Pad (#L) and stick it onto the installed Clamp L-Bracket as shown.
- Partially install the Clamp Bolts (#R) to the Clamp Screw Assembly (#I), then place the Clamping Plate (#K) onto the tips of the bolts.

Step 1b

Grommet Installation for 10-48mm thickness desks & $\phi 10$ -60mm installation holes

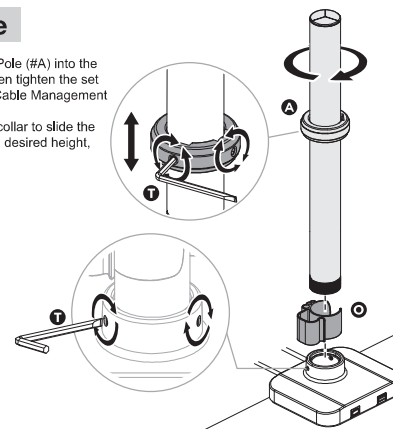

- Connect Grommet Plate (#J) to the Base (#F) using Bolts (#Q) and tighten until secure.
- Peel off the backing from Adhesive Pad (#L) and stick it onto the installed Grommet Plate as shown.
- Insert one of the Grommet Bolts (#R) through the center of the Clamping Plate (#K).
- Place the Base (#F) over the grommet hole, and attach the grommet bolt and clamping plate from underneath the desk and tighten until secure.

Step 2

Install the Pole

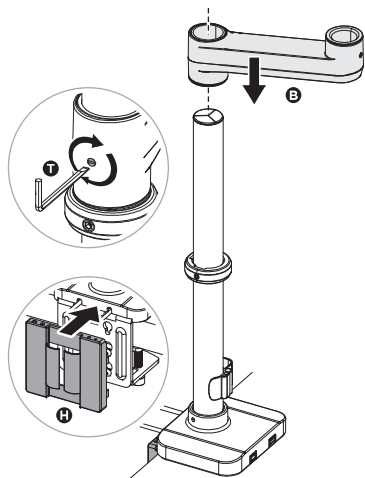

- Twist the threaded end of the Pole (#A) into the Base until it is fully tightened, then tighten the set screws on the base. Place the Cable Management Clip (#O) onto the pole.
- Loosen the set screws on the collar to slide the collar up or down the pole to the desired height, then retighten.

Step 3

Install the Lower Arm

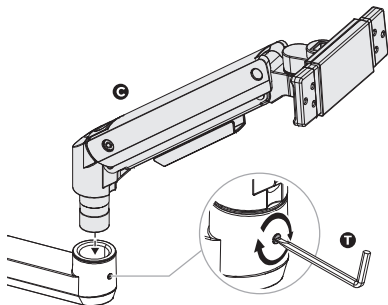

- Slide the Lower Arm (#B) onto the pole until it rests on the collar, then partially tighten the set screw.
- Attach the Clamp Cover (#H) to the rear of the clamp to utilize the cable management clips and to store the Hex Wrenches.

Step 4

Attach the Spring Arms

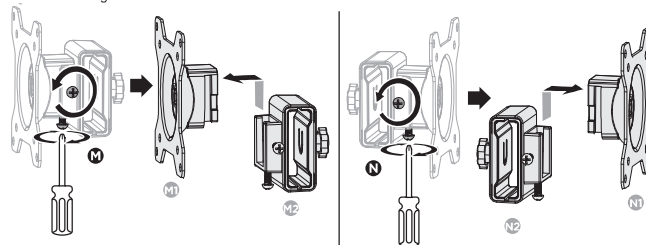

- Place the Spring Arms onto the end of the Lower Arms, then partially tighten the set screw.

Step 5

Separate the VESA Plates

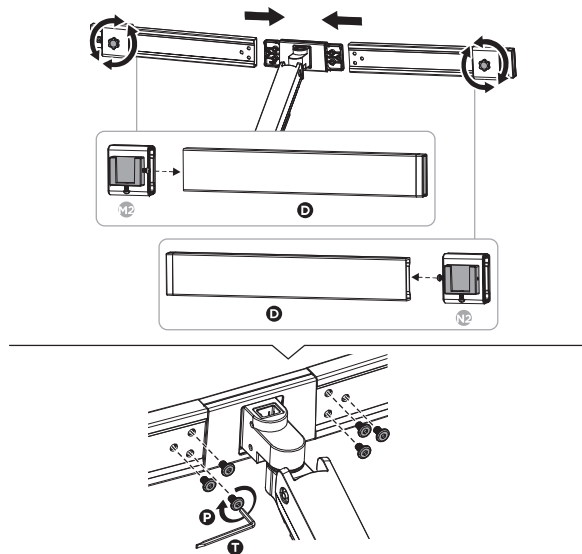

- Loosen the bolts on the side and bottom of the VESA Mounts (#M, N) until the VESA plate separates from the sliding bracket.

Step 6

Attach the Rails

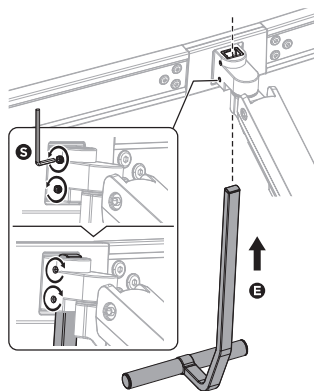

- Slide the brackets from the VESA Mounts onto each of the Horizontal Rails (#D) in the orientation shown here. Place the Horizontal Rails (#D) onto each side of the Spring Arm.
- Secure the Horizontal Rails using the Bolts (#P) and tighten until secure.

Step 7

Attach the Handle

- Insert the end of the handle into the hole near the center joint, then tighten the set screws to secure the handle in place.

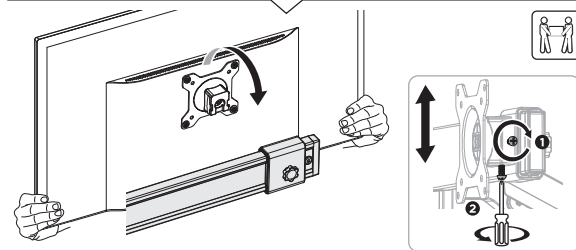

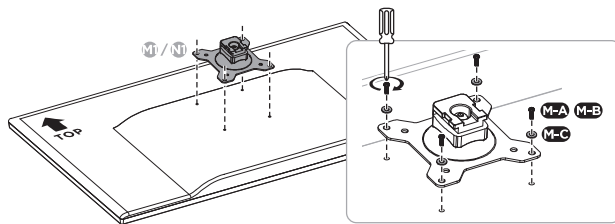

Step 8

Attach the VESA Plate to the Monitor

- Select the appropriate size mounting bolt (#M-A, M-B) and washer (#M-C) for your display's mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size for your display refer to your TV user manual or contact the TV manufacturer for sizing information. Secure the VESA Plate to the monitor using the selected bolts, then hang the monitors onto the VESA mounts.

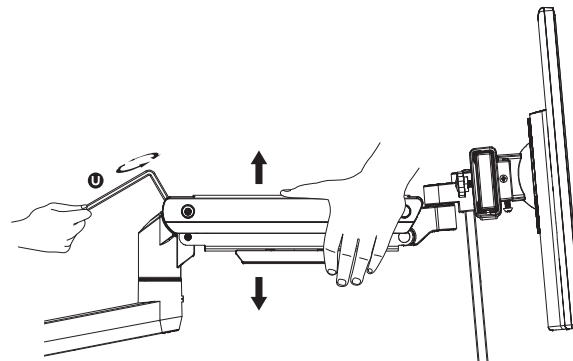

1. Tighten the side bolts to secure the monitors to the mount.
2. Adjust the bottom bolts to level the height of the monitors so that they are even.

Step 9

Weight Balancing the Gas Spring Arm

- Gas Spring tension may need to be adjusted to suit the weight of the monitors. To weight balance the two gas spring arms, begin by pushing the arm down to the lowered position, then use Hex Wrench (#U) to adjust the nut as pictured above, turning counterclockwise toward the + (plus) sign for heavier monitors, increasing the tension and clockwise toward the - (minus) sign for lighter monitors, lowering the tension. Adjust until the arm does not raise back to the highest position or sink to the lowest position when released. This might require multiple rotations to reach the desired tension.

To properly balance the arm with monitor mounted, adjust the spring tension using the supplied Allen Key as follows:

First, position and firmly hold the arm horizontally as shown. Ask for assistance should you require it.

CAUTION: To avoid damage to monitor or mount, always keep the arm in a horizontal position while making adjustments. Again, ask for assistance if required.

If the arm **drops**, turn the adjustment screw counter-clockwise until it stays in a horizontal position.

If the arm **risks**, turn the adjustment screw clockwise until it stays in a horizontal position.

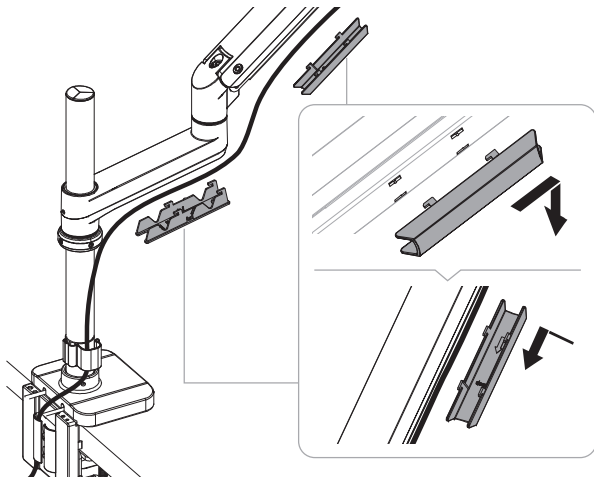

CAUTION: DO NOT over tighten the screws.

Step 10

Cable Management

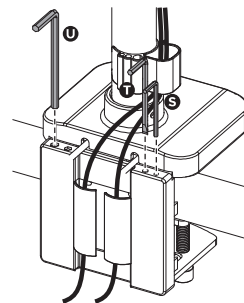

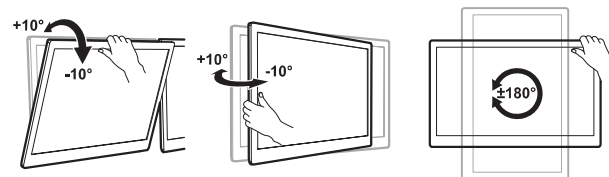

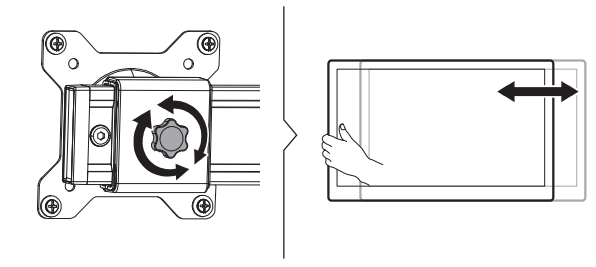

- Remove the cable management covers by sliding them up parallel to the arms, then pull them away. Route cables and reinstall the covers.

Step 11

Final Adjustments

- To adjust the spacing of the monitors loosen the knobs on the back of the VESA Mounts, move the screen into position, then tighten the knobs again.
