DIMENSIONS & WEIGHT CAPACITY

Rated weight capacity is 275lbs/125kgs per screen.

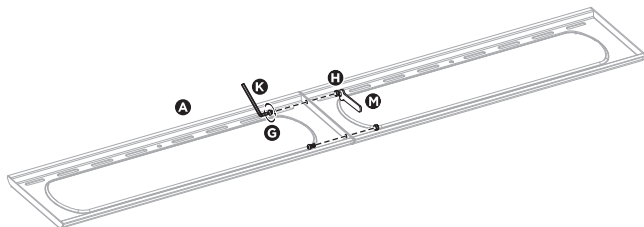

Caution:

Ensure all mounting surfaces are capable of holding the weight of your mount.
DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY.
SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!

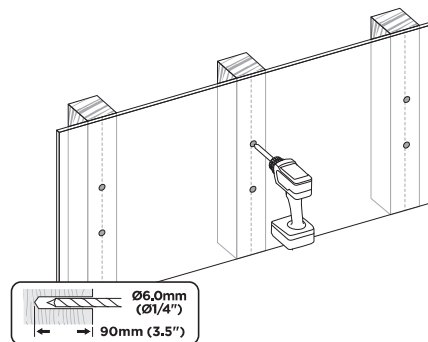

Step 1

Assemble the Wall Plate

- Attach the two halves of the Wall Mount (#A) together using the Bolts (#G) and the Nuts (#H).

- Remove the template from the wall and drill holes in the marked locations using a 1/4" drill bit (6mm) to a depth of 3.5" (90mm).

Step 2a

Wood Stud Installation Option

Choose which template mounting holes will be used, considering the final placement of the TV, and the template alignment with your studs.

Compatible stud spacings include:

3 Studs at 16" Spacing

- Recommended - 6 Lag Screws (#W-A) required, 2 per stud.

2 Studs at 24" Spacing

- Center the bracket and TV on the studs. 4 Lag Screws (#W-A) are required, 2 per stud.

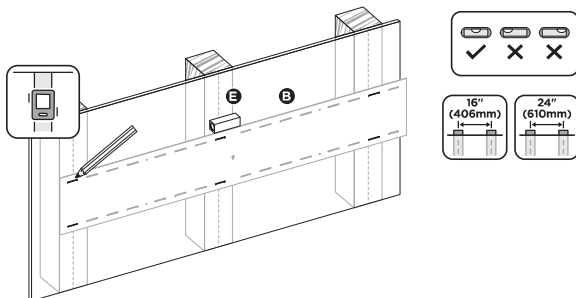

Alternative Installation 16" or 24" Spacing - VESA width under 600mm.

- Install 1 Wall Mount (#A) plate only. 4 Lag Screws (#W-A) are required, 2 per stud.

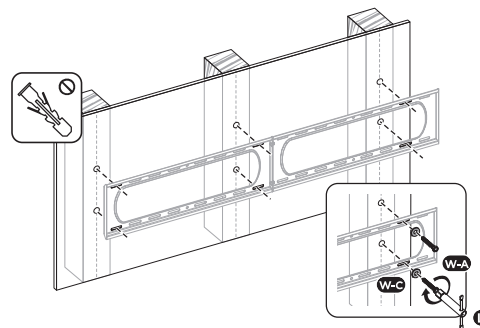

-(See Alternative Step 2C at the end of the manual for full instructions when installing 1 plate.)

Installation

- Use a stud finder to locate the center of the studs and hold Template (#B) to the wall in the desired mounting location.
- Use a Bubble Level (#E) to ensure that the template is level.
- Mark the center of the studs through the template as shown.

- Hold the Wall Mount (#A) to the wall over the holes, check the level once again, and install the Lag Screws (#W-A) and Washers (#W-C) then tighten until secure.

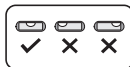

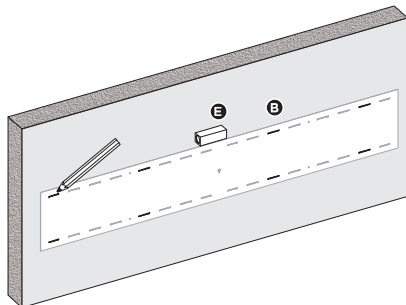

Step 2b

Concrete/Brick Installation Option

- Hold the Template (#B) to the wall in the desired mounting location.
- Use a Bubble Level (#E) to ensure that the template is level.
- Mark the center of the holes through the template in the locations shown.

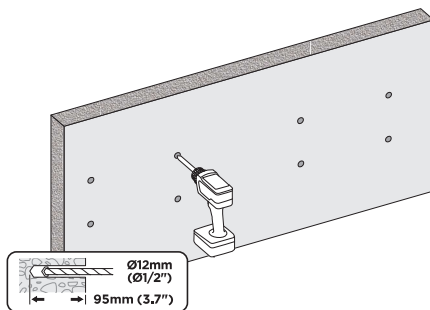

Alternative Installation - VESA width under 600mm.

- Install 1 Wall Mount (#A) plate only, 6 Lag Screws (#W-A) are required, 1 per corner, the remaining 2 near the center. (See Alternative Step 2C at the end of the manual for full instructions when installing 1 plate.)

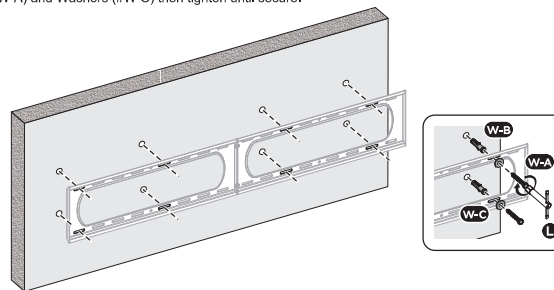

- Remove the template from the wall and drill holes in the marked locations using a 1/2" drill bit (12mm) to a depth of 3.7" (95mm).

Note: Do not drill mounting holes into mortar (such as between bricks or stones) only drill and install into solid stone or concrete surfaces.

- Clear dust or debris from the holes and insert the Concrete Anchors (#W-B) fully until flush with the wall. Hold the Wall Mount (#A) to the wall over the holes, check the level once again, and install the Lag Screws (#W-A) and Washers (#W-C) then tighten until secure.

Step 2c

Single Wall Plate Installation

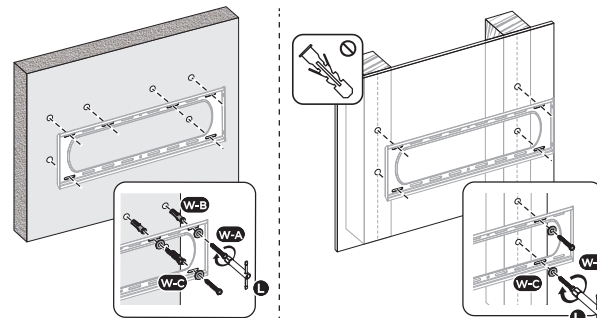

For TV's with a VESA width of 600mm or less, and/or for instances when the full width (53.9") of the dual plate Wall Mount (#A) is not required for centering the screen, a single wall plate can be mounted instead.

Concrete Installation

- Hold the Wall Mount (#A) to the wall in the desired mounting location. Use a bubble level to ensure that the plate is level. Mark the center of the holes through the mount, 1 on each corner, and 2 evenly spaced on the top of the mount, for a total of 6 holes (4 on top, 2 on bottom). Drill holes in the marked locations using a 1/2" drill bit (12mm) to a depth of 3.7" (95mm). Insert the Concrete Anchors (#W-B), then secure the mount to the wall using the Lag Screws (#W-A) and Washers (#W-C).

Wood Stud Installation Option

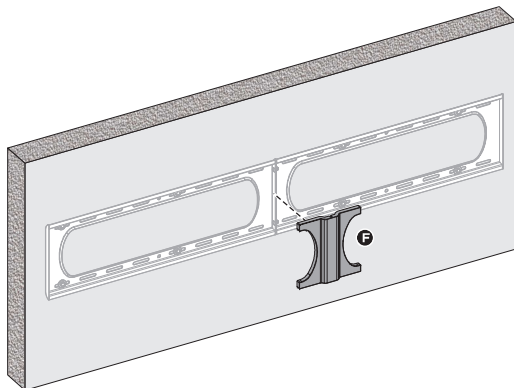

- Use a stud finder to locate the wall studs then hold the Wall Mount (#A) to the wall in the desired mounting location. Use a bubble level to ensure that the plate is level. Mark the center of the holes through the plate in the center of each stud. Drill holes in the 4 marked locations using a 1/4" drill bit (6mm) to a depth of 3.5" (90mm). Hold the Wall Mount (#A) to the wall over the holes, check the level once again, and install the Lag Screws (#W-A) and Washers (#W-C) then tighten until secure.

Step 3

Attach the Cover

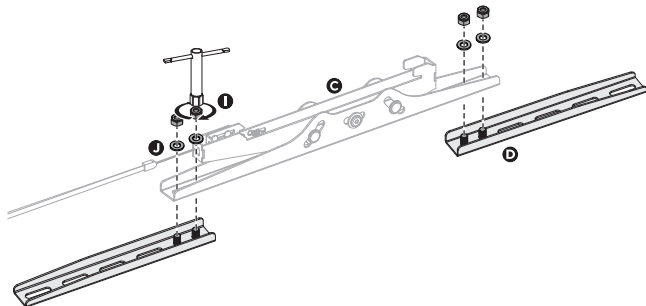

- Place the Decorative Cover (#F) into position over the center of the Wall Plate (#A).

Step 4

Attach the VESA Extenders

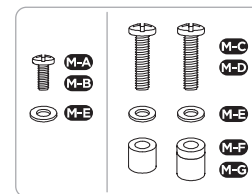

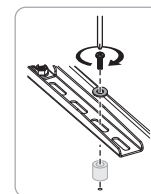

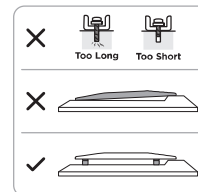

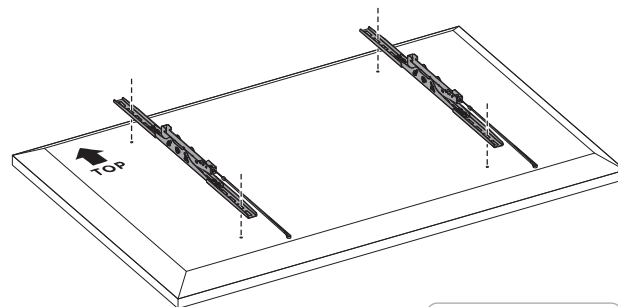

- Attach the VESA Extenders (#D) to the ends of both VESA Brackets (#C) using the Washers (#J) and the Nuts (#I).

Step 5

Attach the VESA Brackets to the TV

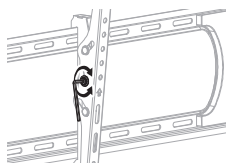

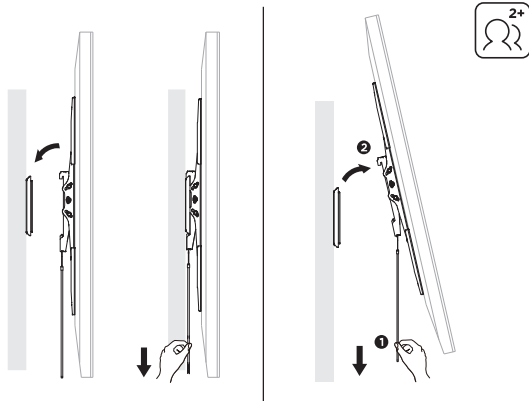

- Select the appropriate size mounting bolt (Select one size #M-A, M-B, M-C or M-D) and washer (#M-E) for your display's mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size for your display refer to your display's user manual or contact the display's manufacturer for sizing information. If necessary, use the included spacers (#M-F, M-G) between the mount and the screen as shown above to adjust the length of the mounting bolt.
- Attach the VESA Brackets (#C) to the TV as shown using the selected bolts.

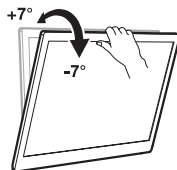

Step 6

Hang the TV on the Wall Mount

- It is recommended that you use the assistance of a second person for this step. Hang the TV on the wall mount as shown so that the top of the VESA brackets hook onto the top of the wall mount, then lower the bottom end of the TV down into place, while pulling down on the release cord until it is in place.
- To remove the TV, pull the release cord down, then lift the TV up and away from the wall.
- The screen can be tilted $\pm 7^\circ$.

Note: If the display does not stop at your desired position, tighten the screws as shown.
