DIMENSIONS & WEIGHT CAPACIY

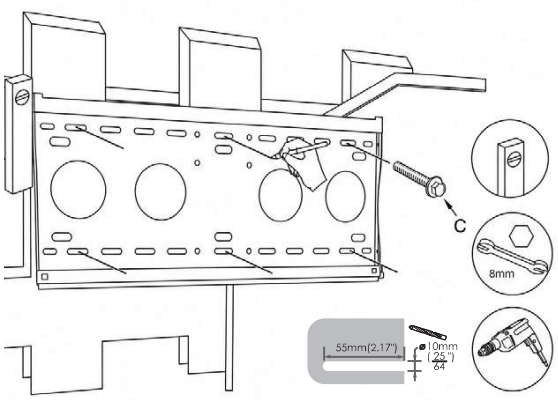

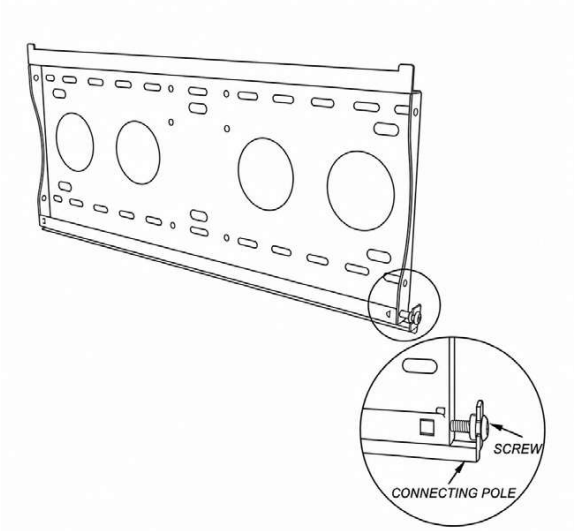

Step # 1a

Wood Stud Mounting Option

• With a stud finder locate the stud and center the mount on the stud at the desired height. Using a bubble level to ensure straightness, hold the Wall Plate (#A) to the wall and mark the center of the 6 mounting holes with a pencil as shown here.
• Use X" drill bit and drill on the marked locations to a depth of X". Secure the Wall Plate (#A) to the wall using Lag Screws (#C). Tighten the screws until secure.

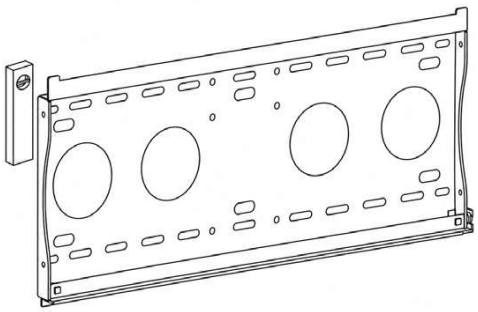

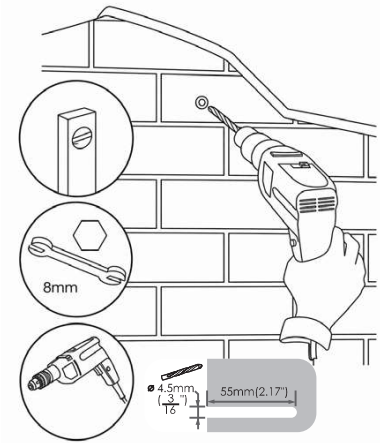

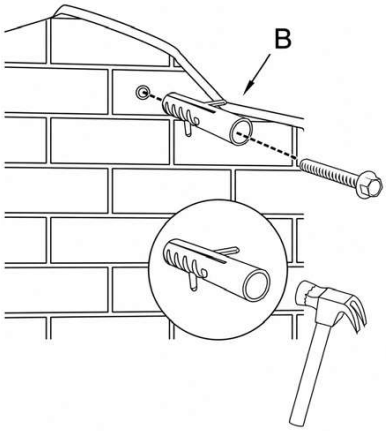

Step # 1b

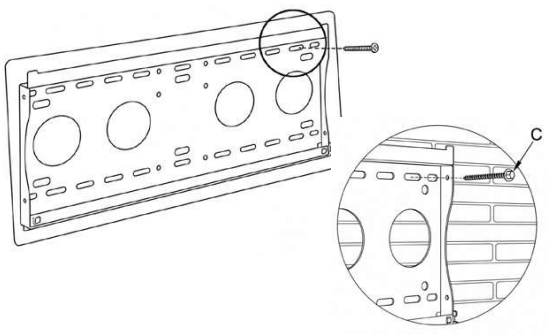

Concrete/Brick Mounting Option

• Using a bubble level to ensure straightness, hold the Wall Plate (#A) to the desired location on the wall and mark the center of the 6 mounting holes with a pencil as shown here.
• Use a 3/16" drill bit and drill on the marked locations to a depth of 2.2". Clear any dust and debris from the holes and insert the Concrete Anchors (#B). Secure the Wall Plate (#A) to the wall using Lag Screws (#C). Tighten the screws until secure.

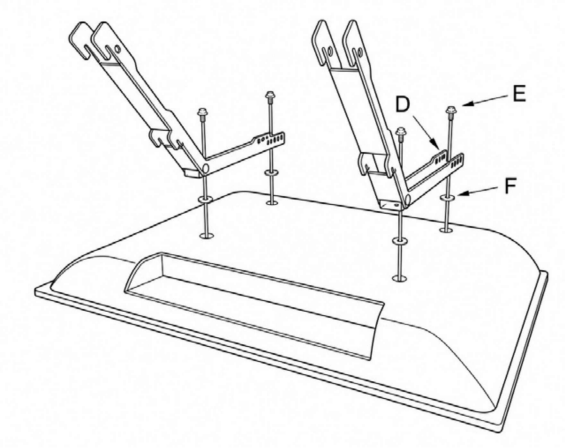

Step # 2

Attach the VESA Brackets to the TV

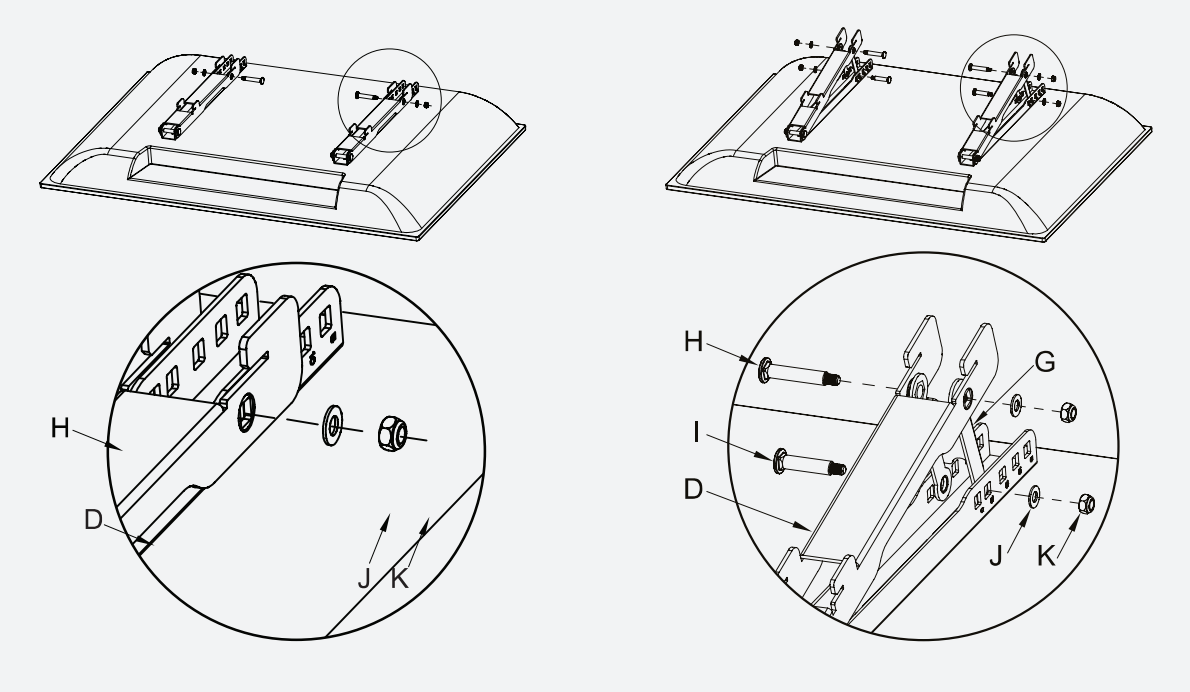

• Lay your TV down on a flat surface and align VESA Brackets (#D) over the VESA holes as shown, unfolding the brackets to access the bolt holes on the inside.
• Select the appropriate size mounting bolt (#E) and washer (#F) for your display's mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size for your display refer to your TV user manual or contact the TV manufacturer for sizing information. Attach the VESA Brackets using the selected hardware in the matching configuration shown here.

Step # 3

Select the Tilt Angle

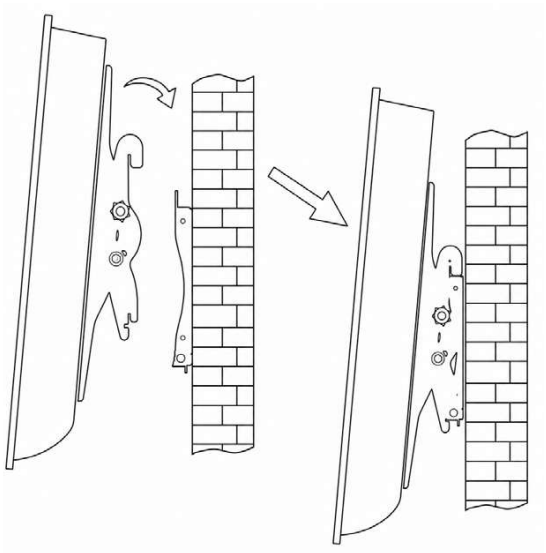

• Select the required tilt angle and secure the VESA Brackets at the corresponding angle. For no tilt, secure the VESA Brackets in the parallel position using the Carriage Bolts (#H), Washers (#J), and Nuts (#K).
• For the various levels of tilt, lift the outer half of the VESA Brackets, and secure it at the desired angle using the Tilt Bar (#G). Secure the Tilt Bar on the higher ends using the Carriage Bolts (#H), Washers (#J), and Nuts (#K). Secure the Tilt Bar on the lower ends using the shorter Carriage Bolts (#I), Washers (#J), and Nuts (#K).

Step # 4

Hang the TV on the Wall Bracket

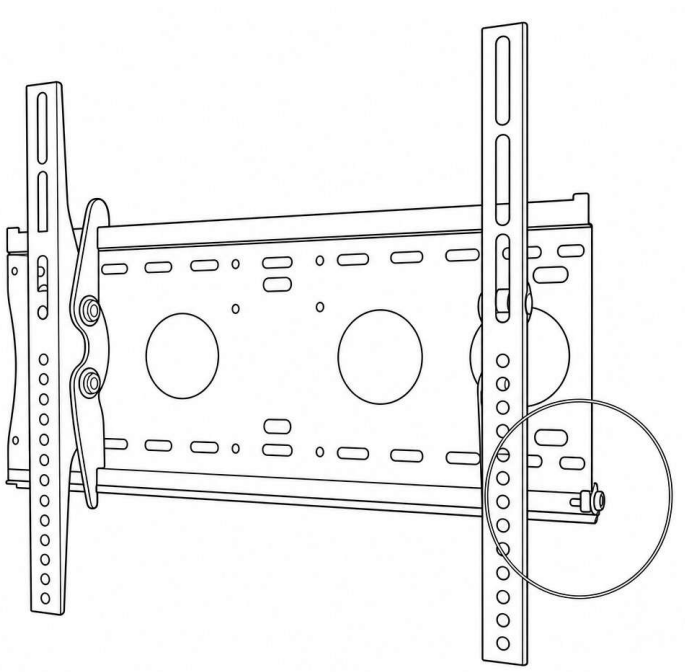

Hook the TV onto the top of the Wall Bracket as shown here, then slowly swing the TV down until it is fully lowered.

Step # 5

Install the Locking Bar

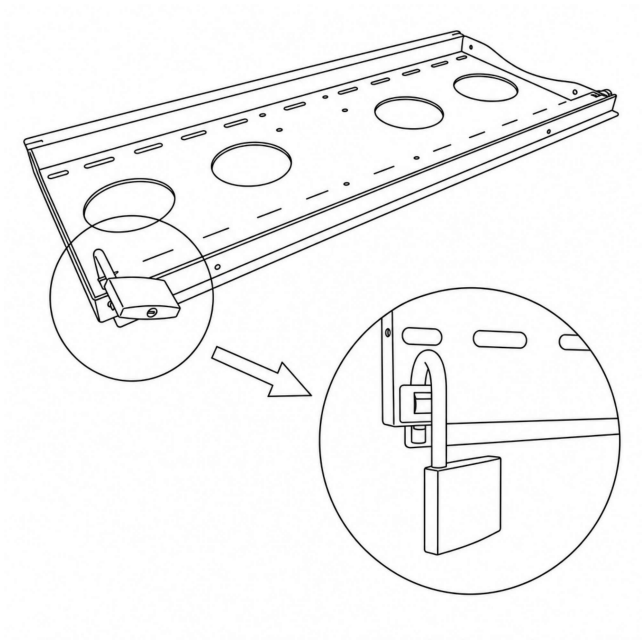

• Slide the Locking Bar into position on the bottom of the Wall Plate, so that it slides through the notches on the VESA Brackets.
• Tighten the bolt on the end of the locking bar so that the TV cannot be removed from the bracket.

Step # 6

Install a Lock (Optional)

Install a lock (not provided) through the hole on the end of the locking bar so that the TV cannot be removed from the mount.
