DIMENSIONS & WEIGHT CAPACITY

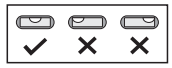

Rated weight capacity is 165lbs for the mount.

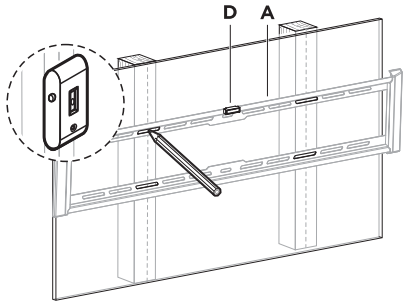

Caution:
Ensure all mounting surfaces are capable of holding the weight of your mount.
DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY. SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!

Step 1

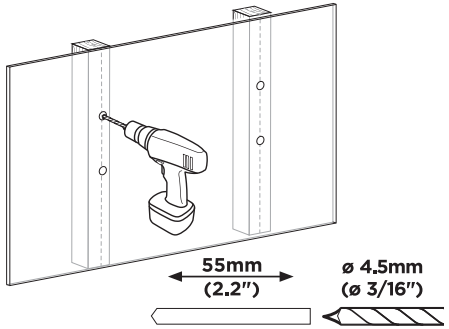

Wood Stud Installation Option

• Use a stud finder to locate the center of the studs and hold Wall Mount(#A) to the wall in the desired mounting location.
• Place the Bubble Level (#D) centered on the top of the Wall Mount (#A) and ensure that the mount is level.
• Mark the center of the studs through the mount as shown.

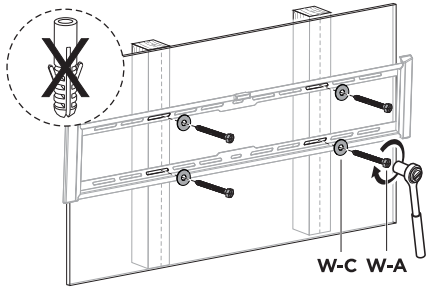

• Remove the Mount from the wall and drill holes in the marked locations using a 3/16” drill bit (4.5mm) to a depth of 2.2” (55mm).

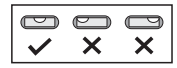

• Hold the Wall Mount (#A) to the wall over the holes, check the level once again, and install the 4 Lag Screws (#W-A) and Washers (#W-C) then tighten until secure.

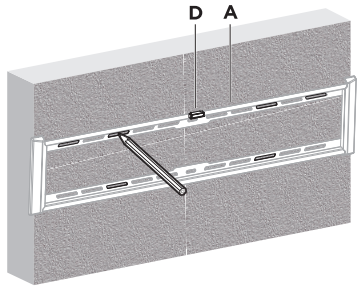

Step 2

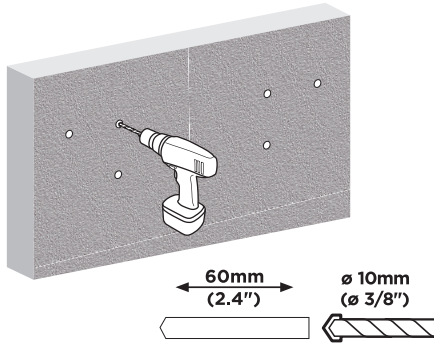

Concrete/Brick Installation Option

• Hold the Wall Mount(#A) to the wall in the desired mounting location.
• Place the Bubble Level (#D) centered on the top of the Wall Mount (#A) and ensure that the mount is level.
• Mark the center of the holes through the mount in the locations shown.

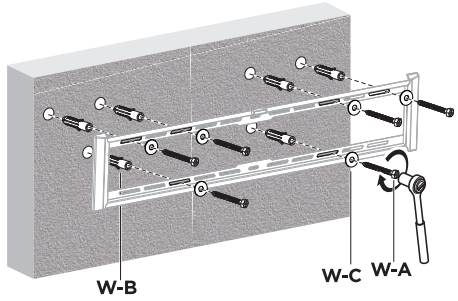

• Remove the Mount from the wall and drill holes in the 6 marked locations using a 3/8” drill bit (10mm) to a depth of 2.4” (60mm).
Note: Do not drill mounting holes into mortar (such as between bricks or stones) only drill and install into solid stone or concrete surfaces.

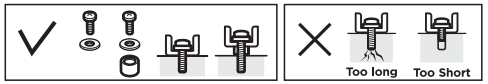

• Clear dust or debris from the holes and insert the Concrete Anchors (#W-B) fully until flush with the wall. Hold the Wall Mount (#A) to the wall over the holes, check the level once again, and install the 6 Lag Screws (#W-A) and Washers (#W-C) then tighten until secure.

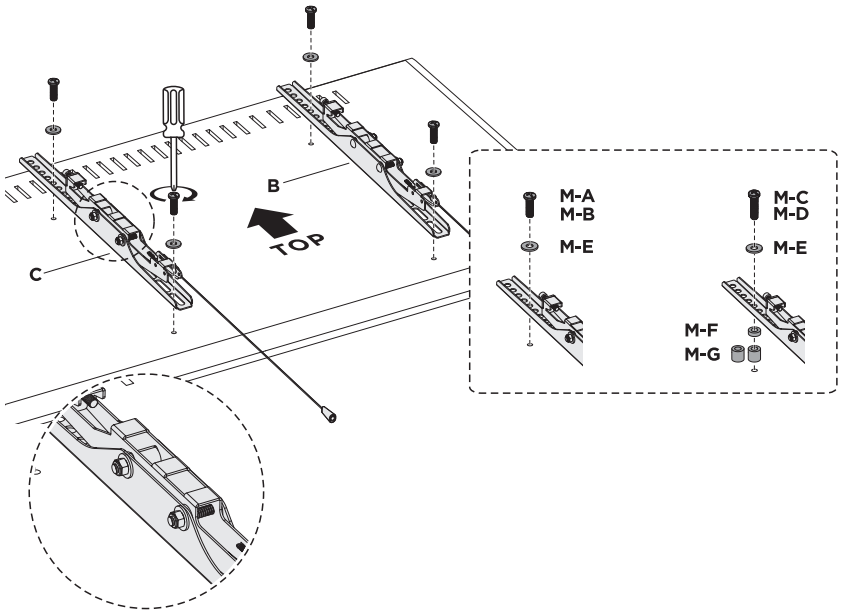

Step 2

Attaching the VESA Brackets to the TV

• Select the appropriate size mounting bolt (Select one size #M-A, M-B, M-C, or M-D) and washer (M-E) for your display's mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size for your display refer to your display's user manual or contact the display's manufacturer for sizing information. If necessary, use the included spacers (#M-F, M-G) between the mount and the screen as shown above to adjust the length of the mounting bolt. Multiple spacers can be used in combination to achieve the desired bolt depth.
• Attach the Right and Left VESA Brackets (#B, C) to the TV as shown using the selected bolts. Ensure that the two nuts on the side of the VESA Brackets are facing toward the outside edge of the TV or you will be unable to properly adjust the tilt of the screen.

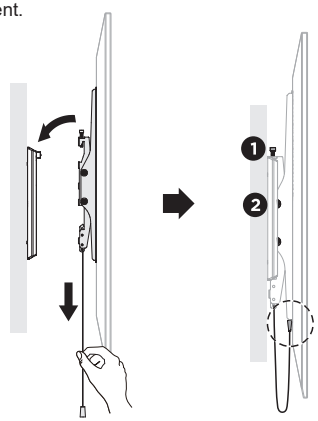

Step 3

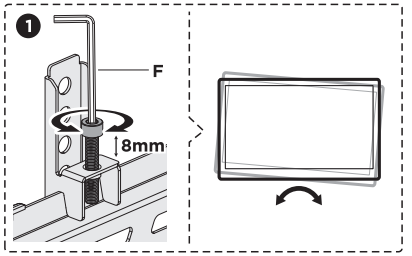

Hang the TV on the Wall Mount

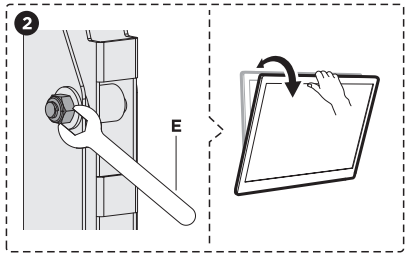

• It is recommended that you use the assistance of a second person for this step. Hang the TV on the wall mount as shown so that the top of the VESA brackets hook onto the top of the wall mount, then swing the bottom of the TV down until the latches on the lower end of the brackets click into place. Attach the pull cords to the wall mount to keep them concealed behind the screen.
1. Tighten the bolts indicated in the magnification bubble #1 to adjust the level of the screen by tightening the bolt on the side that needs to be raised and loosen the bolt on the opposite side if it needs to be lowered. These bolts may also prevent the mount from being easily lifted off the wall mount. Loosen these bolts if they are interfering with the removal of the tv from the mount.
2. Partially loosen the upper nut indicated in the magnification bubble #2 on both VESA brackets to adjust the tilt of the screen. Once the desired tilt is achieved tighten the bolts back down to prevent further movement.

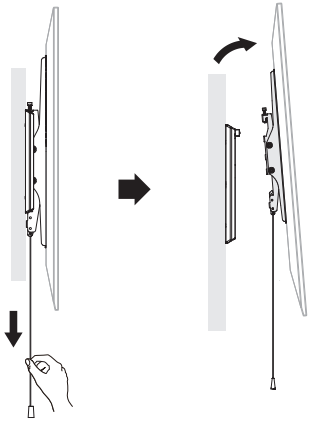

Note: Attach the magnetic pull strap to a metal surface on the mount to his the strap when not in use

• To remove the TV from the wall mount, pull down on the pull cords to release the latches, pull the base of the TV away from the wall, then lift the TV up and off of the wall mount.
