DIMENSIONS & WEIGHT CAPACITY

Rated weight capacity is 2.2lbs for the mount.

Caution:
Ensure all mounting surfaces are capable of holding the weight of your mount.
DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY.
SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!

Step 1

Installing the Pole

- Install the Pole (#D) to the Base (#C) through the Pole End Cap (#E) as shown in the magnification by using M5x16 Bolts (#L) and 3mm Hex Wrench (#T).

Step 2

Concrete Floor Installation (Optional)

- If desired, the tablet assembly can be secured to the floor. To secure the stand base to a concrete surface use a 3/8" bit and drill holes to a depth of 2.4". Clear any dust and debris from the holes and insert the Concrete Anchors (#R). Secure the stand base using Lag Screws (#Q) and Washers (#S).

Step 3

Assemble the Anti-Theft Case

- Connect the Anti-Theft Tablet Case (#A) to the Mounting Plate (#B) using 4x M5x20 Bolts (#M) through the front of the case as shown here.

Step 4

Attach the Silicone Pads

- Select the appropriate silicone pads for the thickness of your device:
 - (#G) 2mm: for tablets 7.5-8.5mm thick.
 - (#H) 3mm: for tablets 6.5-7.5mm thick.
 - (#I) 4mm: for tablets less than 6.5mm thick.
- Once selected, remove the cover from the adhesive and install the pads so that they fit over the 4 indentations.

Step 5

Connect the Anti-Theft Tablet Case to the Pole

• Connect the Anti-Theft Tablet Case to the Pole by inserting the back of the case into the joint as shown, then connect it using the parts in the order shown here. Bolt (#N) should be installed in order through Lock Washer (#O), Washer (#P), Locking Block (#J) then finally Locking Nut (#K).

Note: Locking Block (#J) and Locking Nut (#K) are similar in appearance. Locking Block (#J) is the one that will allow Bolt (#N) to pass through it.

Step 6

Insert the Tablet into the Anti-Theft Tablet Case

1. Expand the arms of the tablet case wide enough to fit your tablet. It can be expanded by pulling the two side arms away from the center of the case. The top arm moves separately and should be opened to the highest position.

2. Insert the tablet then close the arms back in until they are firmly holding all 4 sides of the tablet.

3. Use the 4mm Anti-Theft TORX Wrench (#U) to tighten the TORX bolt to lock the arms in place.

CAUTION: To secure the tablet in place, ensure the TORX wrench is fully inserted into TORX bolt and tighten until secure. If the TORX bolt is not rotating the arms are not locked into position. To verify security of the tablet attempt to expand the top arm. If the top arm does not move, then the tablet is secure.

Step 7

Height Adjustment and Cable Management

• Adjust the height of the pole by loosening the hand knob on the rear of the pole, then raise or lower the pole to the desired position and tighten the hand knob back down.

• Install Cable Management Insert (#F) into the hole at the base of the pole. Cables can be run through the center of the pole for cable management and organization.

Step 8

Final Adjustments

• The screen can be rotated to be in either portrait or landscape orientation.

• To center the screen on the pole when in landscape orientation, loosen the screw on the rear of the case indicated here, slide it to the appropriate location and tighten the screw once again to lock it in place.
