MAX

Step 1a

Attaching the Mount Arm (Pole Diameters Between 1.1"-1.77")

- Using Hex Wrench (#F) loosen the two bolts on the clamp end of the Mount Arm (#A) until the clamp opens wide enough to slide onto the pole.
- Move the Mount Arm to the desired height and tighten the bolts back down until secure.

Step 1b

Attaching the Mount Arm (Pole Diameters Between 1.81"-2.36")

- Using Hex Wrench (#F) remove the two bolts on the clamp end of the Mount Arm (#A) and replace them with the Alternate Bolts (#D). After reinstalling the alternate bolts, adjust the width of the clamp to be slightly larger than the pole.
- Move the Mount Arm to the desired height and tighten the bolts back down until secure.

Step 2a

Attaching the VESA Plate (No Spacers)

- Select the appropriate size mounting bolt (#M-A, M-B, M-C, M-D) and washer (#M-E) for your display's mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size for your display refer to your TV user manual or contact the TV manufacturer for sizing information. Attach the VESA Plate using the selected bolts and tighten until secure. Do not overtighten.

Step 2b

Attaching the VESA Plate (With Spacers)

- Select the appropriate size mounting bolt (#M-A, M-B, M-C, M-D) and washer (#M-E) for your display's mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size for your display refer to your TV user manual or contact the TV manufacturer for sizing information. If necessary, use the included spacers (#M-F) between the mount and the TV as shown above to adjust the length of the mounting bolt. Multiple spacers can be used in combination to achieve the desired bolt depth. Attach the VESA Plate using the selected bolts and tighten until secure. Do not overtighten.

Step 3

Connecting the VESA Plate to the Mount Arm

- Slide the VESA plate onto the end of the Mount Arm as shown, then secure it in place using the Thumb Screw (#C).

Step 4

Adjusting the Viewing Angle

- To adjust the viewing angle of the screen use Hex Key (#F) to loosen the bolt shown here, adjust the monitor to the desired angle, and tighten the bolt back down.

Step 5

Final Adjustments

- The screen can be tilted forward or backward in a range of $+30^\circ$ to -30° . It may be turned left or right up to 90° in each direction, and the screen can be rotated 180° to change from landscape to portrait orientation at will.
