DIMENSIONS & WEIGHT CAPACITY

Rated weight capacity is 55lbs/25kgs for the mount.

Caution:

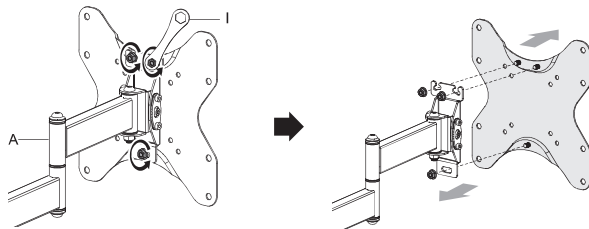

Ensure all mounting surfaces are capable of holding the weight of your mount.
DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY.
SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!

Step 1

Remove VESA Plate from Mount Arm

Using the Wrench (#I), remove the three nuts located on the back of the VESA plate attached to the Mount Arm (#A) and separate the plate from the end of the arm.

Step 2

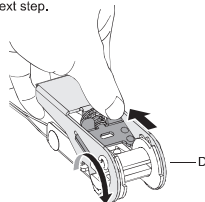

Strap the Mount to the Pole

Open the Ratchet Straps (#D) by pulling the latch upward toward the handle to release and open the buckle.

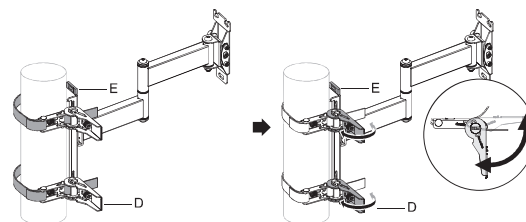

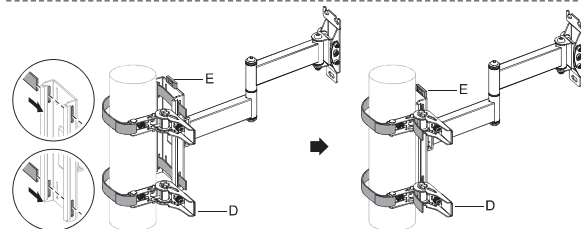

1. Hold the Mount Arm (#A) against the pole (use the Bubble Level (#E) to check the alignment) and wrap the Ratchet Straps (#D) around the pole, passing the loose end through the mount bracket as shown.
2. Insert the loose end of the Ratchet Straps (#D) through the opening on the ratchet buckle.
3. Thread the strap through the center of the buckle and pull it out the opposite side.
4. Tighten the strap by moving the ratchet handle back and forth repeatedly until the Mount Arm (#A) is securely fastened to the pole.

5. Attach the Cable Management Clips (#F) onto the Mount Arm (#A) as shown.

CAUTION: Ensure the straps are fully tightened and the mount is secure before proceeding to the next step.

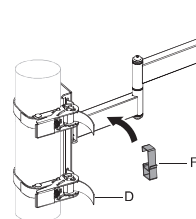

Press the latch to open the buckle.

Thread the strap through the center gap as shown.

Turn the buckle handle back and forth to tighten the strap.

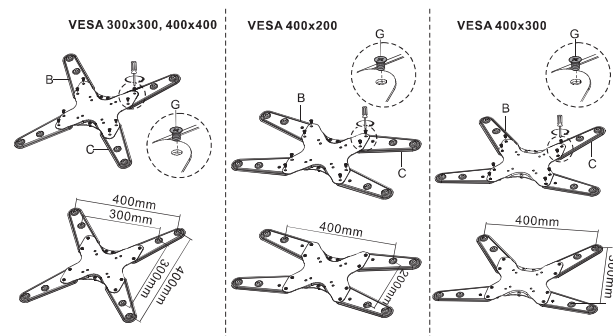

Step 3

Attach the VESA Extensions

If your monitor has a VESA pattern of 200x200 or smaller, the VESA Extensions (#B) and (#C) are not required. Proceed to the next step to attach the VESA plate directly to your screen.

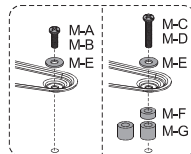

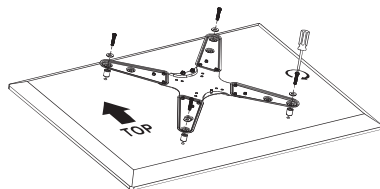

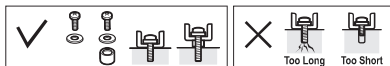

For VESA patterns larger than 200x200 up to 400x300, attach the VESA Extensions (#B) and (#C) to the VESA plate using the Bolts (#G) in one of the configurations shown.

Step 4

Attach the VESA Plate to the TV

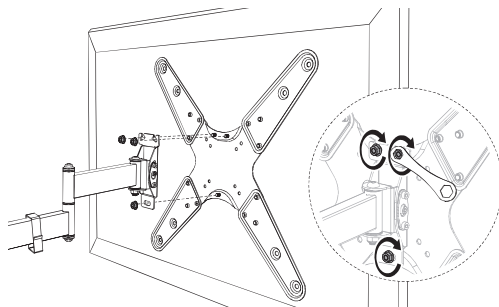

Select the appropriate size mounting bolts (Select one size #M-A through M-D) and washers (#M-E) for your display's mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size for your display refer to your TV user manual or contact the manufacturer for sizing information. If necessary, use the included spacers (#M-F, #M-G) between the mount and the screen as shown to adjust the length of the mounting bolt. Multiple spacers can be used in combination to achieve the desired bolt depth. Attach the VESA Plate using the selected bolts and washers then tighten until secure.

Step 5

Attach VESA Plate to Mount Arm

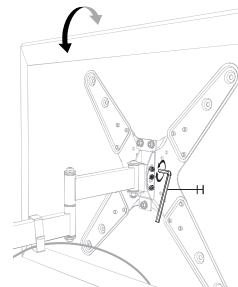

With the screen attached, align the VESA plate with the mounting head on the Mount Arm (#A), then reinstall and fully tighten the three nuts using the Wrench (#I) to securely fasten the TV in place.

Step 6

Adjust Tilt Tension

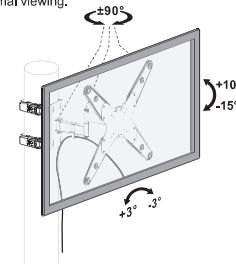

Use the 4mm Hex Wrench (#H) to loosen or tighten the tilt adjustment bolts on the side of the mount to allow movement or secure the screen at the desired viewing angle.

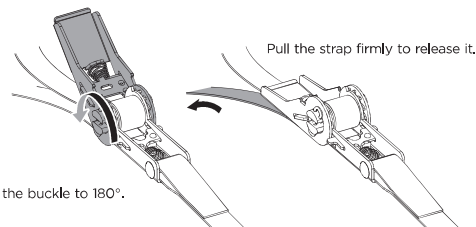

Step 7

Final Adjustments

Adjust the screen to your desired position by rotating at each joint, tilting the screen from $+10^\circ$ to -15° , and leveling the display $\pm 3^\circ$ for optimal viewing.
