DIMENSIONS & WEIGHT CAPACITY

Rated weight capacity is 165lbs/75kgs for the mount.

Caution:

Ensure all mounting surfaces are capable of holding the weight of your mount.
DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY.
SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!

Step 1

Measure the VESA Width of Your TV

Measure the horizontal distance between the upper mounting holes on the back of your TV to determine proper spacing for the Wall Mounts (#B).

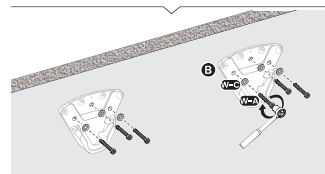

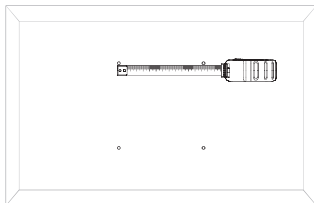

- Measure the distance between the top left and top right VESA holes in millimeters (mm).
- This measurement will determine the horizontal placement of the Wall Mounts (#B) on the wall.

NOTE:

Most TVs follow a standard VESA pattern (for example: 200x200, 400x400, etc.). If you already know your TV's VESA pattern, you may use the **first number (width in mm)** instead of measuring manually.

Example:

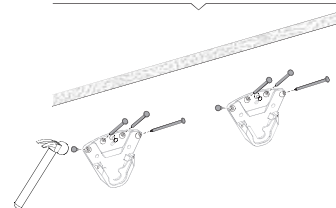

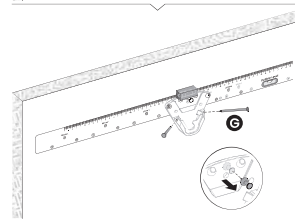

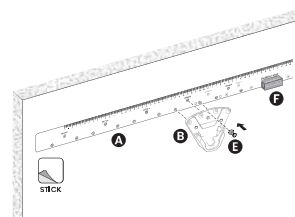

If your TV is VESA 400x600, the wall mount spacing should be **400 mm apart**.

Step 2b

Drywall Installation Option (No Studs Required)

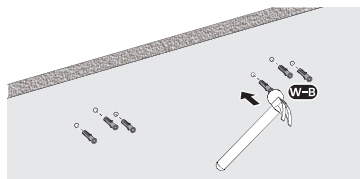

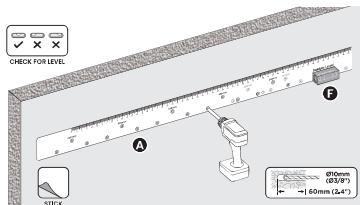

- Use the VESA width measurement from Step 1 to ensure proper spacing. Peel the adhesive backing from the Wall Template (#A) and press it firmly onto the wall at the desired height, using the Bubble Level (#F) to ensure the template is level.
- Position the Wall Mounts (#B) over the corresponding template holes that match your measured width. Insert a Pushpin (#E) through the center hole of each Wall Mount (#B) to temporarily secure it in place.
- Hammer the lower 2 Drywall Nails (#G) into each Wall Mount (#B).
- Remove the Pushpins (#E) and carefully peel the Wall Template (#A) from the wall. Install the remaining upper Drywall Nails (#G) and hammer them in fully until the Wall Mounts (#B) are firmly secured.

Step 2a

Concrete Wall Installation Option

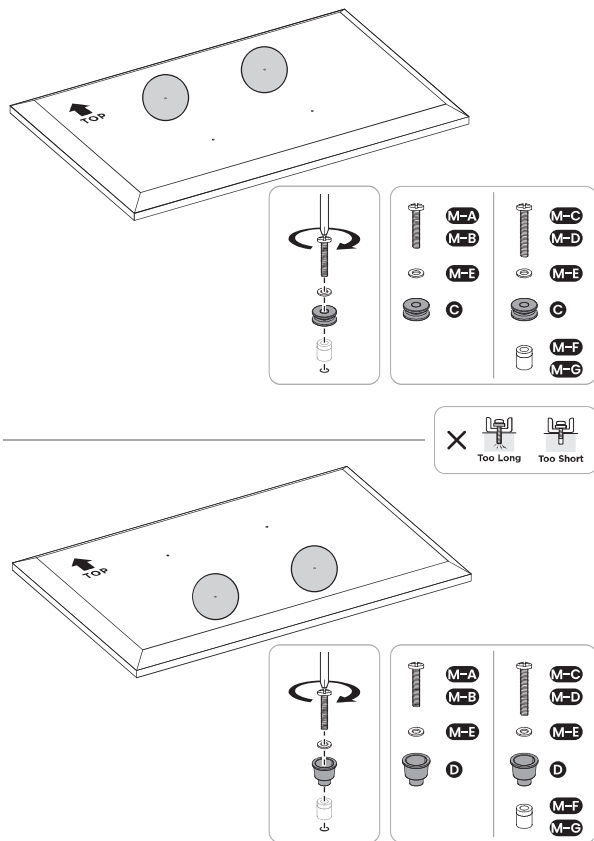

- Use the VESA width measurement from Step 1 to ensure proper spacing. Peel the adhesive backing from the Wall Template (#A) and press it firmly onto the wall at the desired height, using the Bubble Level (#F) to ensure the template is level.
- Using a Ø3/8" masonry bit (10mm), drill holes at the corresponding locations to a depth of 2.4" (60mm).
- Remove the template from the wall then insert the Ø10x45 Concrete Anchors (#W-B) into each drilled hole until flush with the wall surface.
- Secure the Wall Mounts (#B) to the wall using the ST6.3x55 Lag Screws (#W-A) and D6 Washers (#W-C). Tighten securely until the Wall Mounts (#B) are firmly attached to the wall.

Step 3

Attach Hanging Brackets to TV

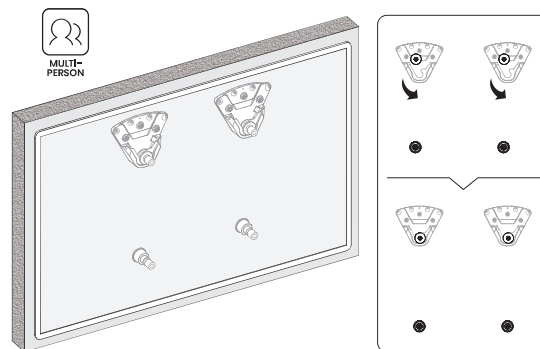

- Select the appropriate size mounting bolts (#M-A through #M-D) for your TV's VESA mounting holes. Verify the bolt length is correct and not too long or too short before installation.
 - If the back of your TV is recessed or uneven, use the Ø15xØ8x5 Spacers (#M-F) or Ø15xØ8x15 Spacers (#M-G) as needed to ensure a secure and flush fit.
 - Attach the Hanging Brackets (#C) to the upper VESA holes, and the Leveling Pads (#D) into the lower VESA holes on the back of the TV using the selected bolts and D8 Washers (#M-E).
- Tighten securely, but do not overtighten.

Step 4

Hang TV onto Wall Mounts

- With the help of another person, carefully lift the TV and align the Hanging Brackets (#C) with the Wall Mounts (#B) installed on the wall.
- Lower the TV straight down so the Hanging Brackets (#C) fully seat into the Wall Mounts (#B).
- Once seated, ensure the TV is securely supported by both Wall Mounts (#B) before releasing the TV.
