DIMENSIONS & WEIGHT CAPACITY

Rated weight capacity is 154lbs/70kgs for the mount.
Caution: Ensure all mounting surfaces are capable of holding the weight of your mount. **DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY.** SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!

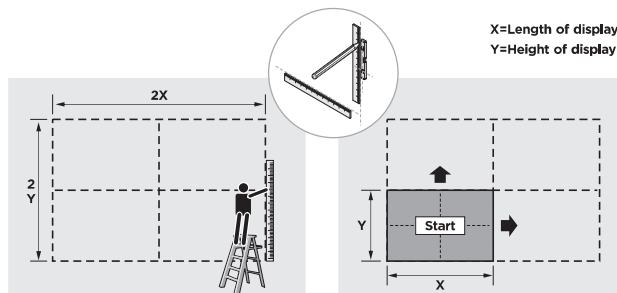

Tools Required - Not Included

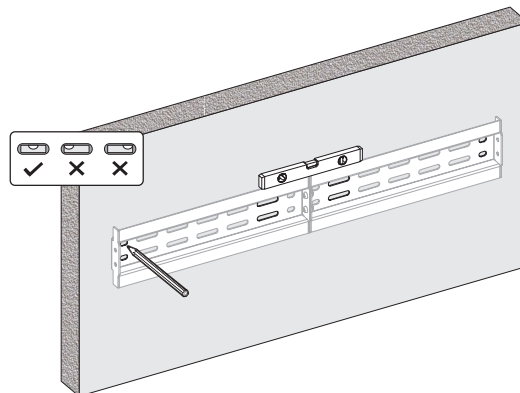

Step 1

Prepare the Video Wall Location

- Trace out the location for the video wall and ensure that the width (X) and height (Y) are equal to the combined measurements of the screens. Begin with the bottom left corner and plot out from there.
- Take note of the placement of the VESA mounting holes on the back of the screen, and adjust the mounting position as needed.

- Beginning with the bottom left mount in the video wall, use a bubble level to ensure straightness and hold the Wall Plate (#A) to the wall in the first screen location and mark the center of the 8 mounting holes.
- Note:** The exact placement of the wall brackets will vary depending on the VESA placement on the back of the screen. Compensate for the height difference as needed, using the diagram in step 3 as reference.

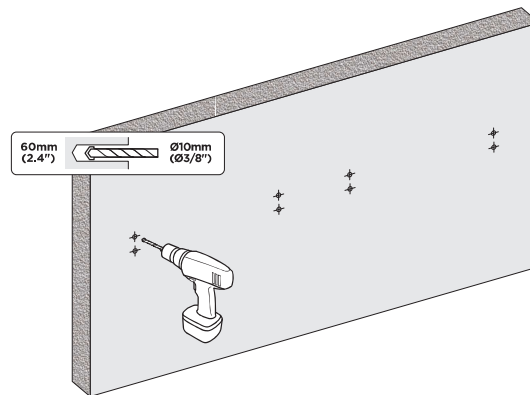

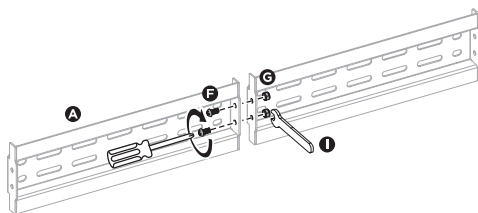

- Drill holes in the 8 marked locations using a 3/8" (10mm) drill bit to a depth of 2.4" (60mm). Insert the Concrete Anchors (#W-B).

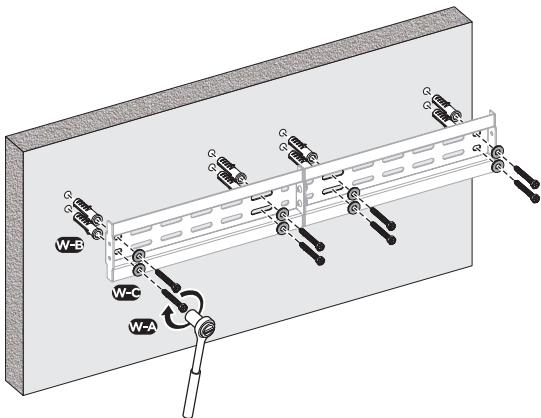

Step 2

Mount the Wall Plate

- Connect the Wall Plates (#A) together using the Connection Bolts and Nuts (#F, G) and tighten them until secure using the Wrench (#I) and a screwdriver.

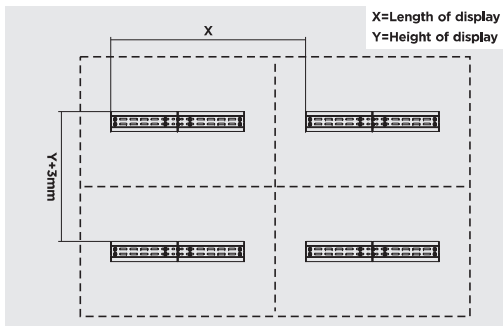

- Secure the mount to the wall using Lag Screws (#W-A) and Washers (#W-C).

Step 3

Wall Plate Placement

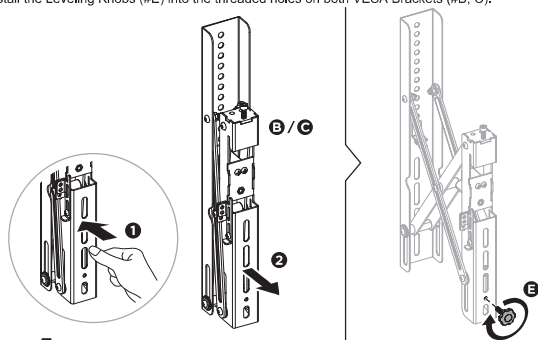

- The remaining Wall Plates should be installed following this diagram.
- The vertical distance (Y) between the top of each wall plate must be equal to the height of the display +3mm. The horizontal distance (X) between the left sides of each wall plate must be equal to the width of the display.

Step 4

Prepare the VESA Brackets

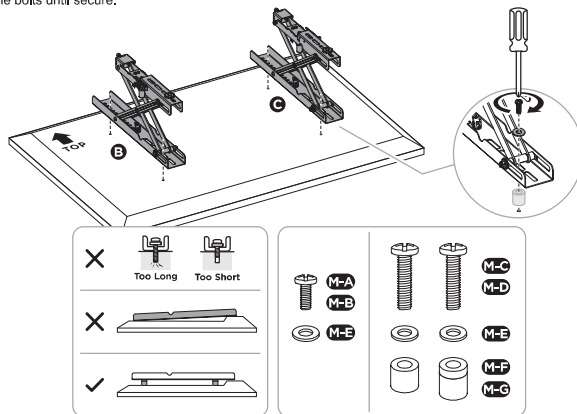

- Press each VESA bracket in, then pull both sides of the bracket apart until they are fully extended.
- Install the Leveling Knobs (#E) into the threaded holes on both VESA Brackets (#B, C).

Step 5

Attach the VESA Brackets to the TV

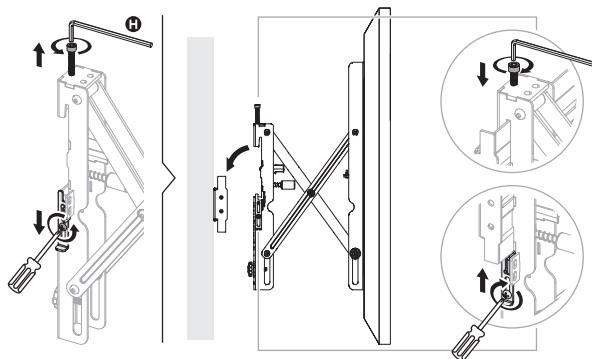

- Select the appropriate size mounting bolt (Select one size #M-A though M-D) and washer (#M-E) for your display's mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size for your display refer to your display's user manual or contact the display's manufacturer for sizing information. If necessary, use the included Spacers (#M-F, M-G) between the mount and the screen as shown to adjust the length of the mounting bolts.
- Attach the left and right VESA Brackets (#B, C) to the TV using the selected bolts and spacers and tighten the bolts until secure.

Step 6

Hang the TV on the Wall Mount

- Loosen the height adjustment bolts on the top of both VESA brackets, then loosen the locking bolts on the sides, and slide the latches down to the lowered and unlocked position.
- Hang the TV on the wall mount by hooking the VESA brackets onto the wall plate.
- Tighten the height adjustment bolts partially, or to your required height, then slide the latches back up and tighten the locking bolts.

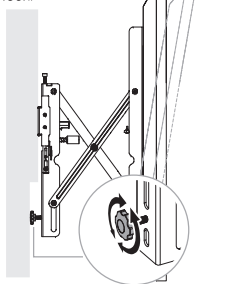

Step 7

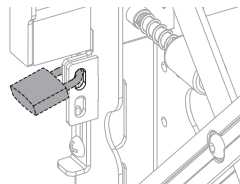

Depth Adjustment

- To level the display vertically, adjust the Leveling Knobs (#E) to adjust the depth of the lower portion of the screen.
- The bracket can be secured using a padlock (not included) to prevent the display being removed from the wall mount.

Note: If the TV is tilting down, you can adjust this knob to keep the TV vertical for a seamless look.

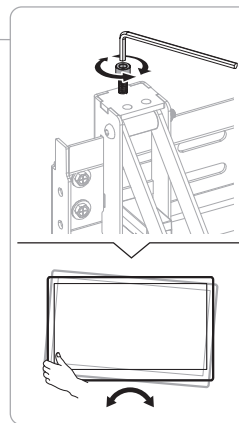

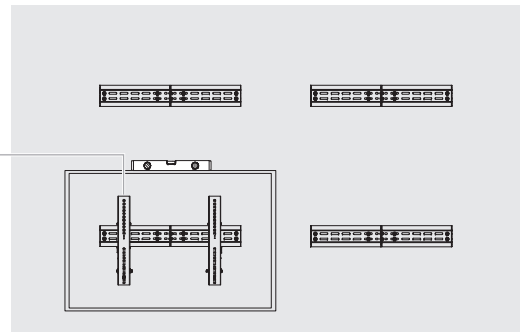

Use a padlock to prevent the display from being stolen (The padlock not included).

Step 8

Level Adjustment

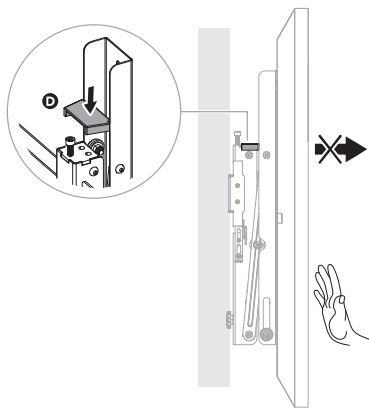

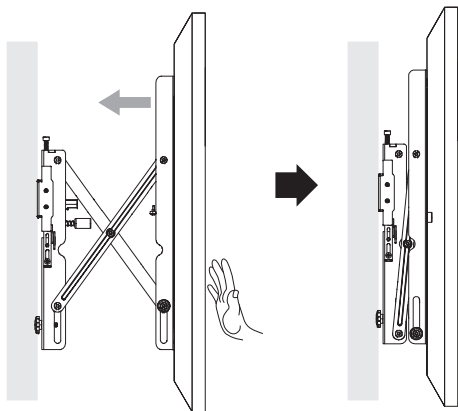

- To level the screen adjust the level adjustment bolts on the top of each VESA bracket.

Step 9

Pop-Out Function

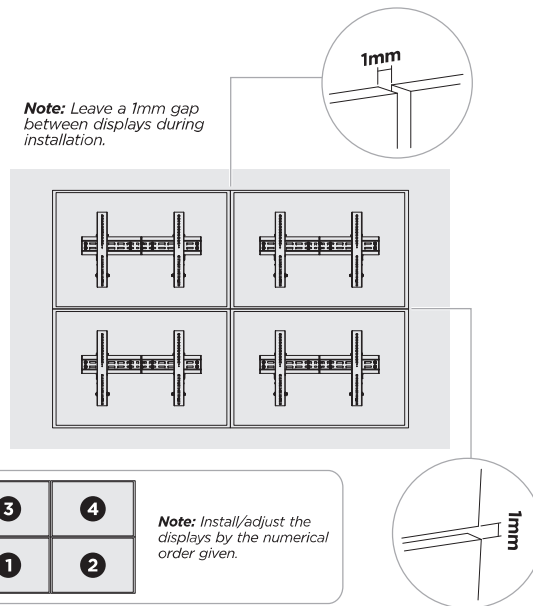

- The screen can be pulled out from the wall for access to cables, and adjustment.
- With the screen pressed fully to the wall, the Bracket Locks (#D) can be placed on the top of the brackets to lock the screen in position.

Step 10

Final Notes

- Leave a 1mm gap between the displays during installation.
- Install the displays by row in order from left to right, bottom to top, beginning with the bottom row.
