DIMENSIONS & WEIGHT CAPACITY

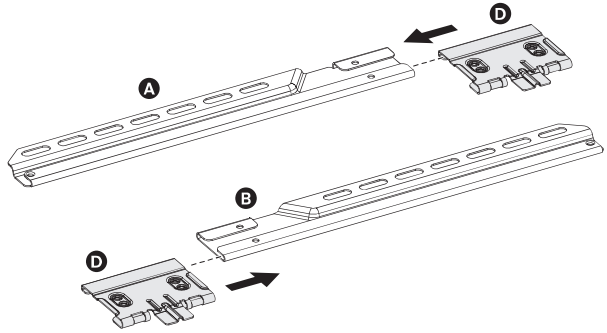

Rated weight capacity is 165lbs/75kgs for the mount
Caution:
Ensure all mounting surfaces are capable of holding the weight of your mount.
DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY.
SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!

Step 1

Attach Hanging Plates

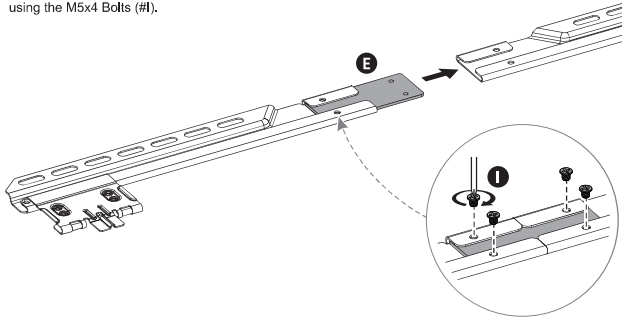

• Slide the Hanging Plates (#D) onto each Wall Plate (#A, #B) as shown.
• Ensure the Hanging Plates (#D) are oriented correctly, matching the direction indicated in the illustration.

Step 2

Connect Wall Plates

• Slide the Connection Plate (#E) into the ends of the Wall Plates (#A, #B) and secure them together using the M5x4 Bolts (#I).

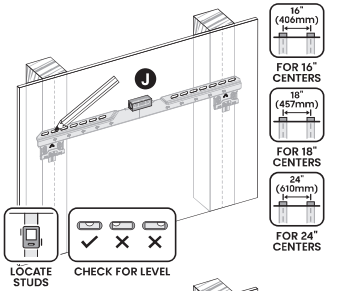

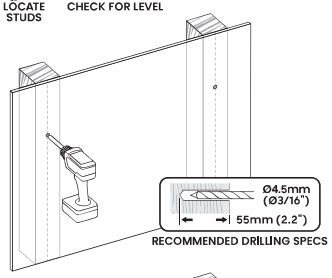

Step 3a

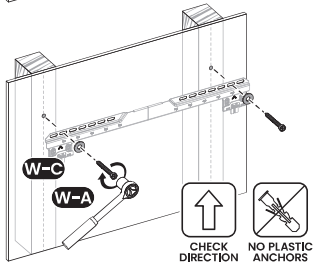

Wood Stud Wall Installation

• Use a stud finder to locate two stud centers. Position the assembled Wall Plates (#A, #B) on the wall at the desired height. Using the Bubble Level (#J), ensure the mount is level and mark the center of the mounting holes with a pencil.
• Use a 3/16" (Ø4.5 mm) drill bit and drill on the marked locations to a depth of 2.2" (55 mm).
• Secure the Wall Plates (#A, #B) to the wall using the ST6.3x55 Lag Screws (#W-A) and D8 Washers (#W-C). Tighten the screws until secure.

WARNING: Install only into wood studs. Do not use Concrete Anchors (#W-B) for this installation.

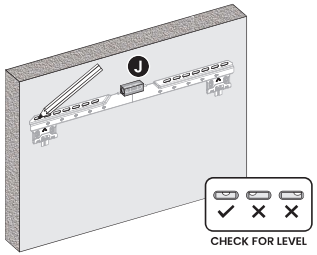

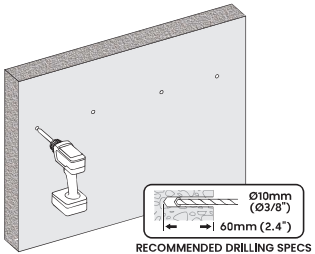

Step 3b

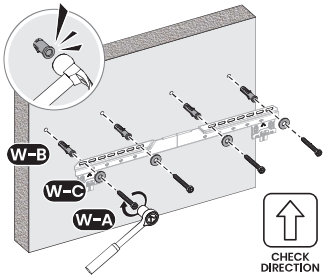

Concrete/Brick Wall Installation

• Using the Bubble Level (#J) to ensure straightness, hold the assembled Wall Plates (#A, #B) to the desired location on the wall and mark the center of the mounting holes with a pencil.

• Use a 3/8" (Ø10 mm) drill bit and drill on the marked locations to a depth of 2.4" (60 mm). Clear any dust and debris from the holes and insert the Concrete Anchors (#W-B). Secure the Wall Plates (#A, #B) to the wall using the ST6.3x55 Lag Screws (#W-A) and D8 Washers (#W-C). Tighten the screws until secure.

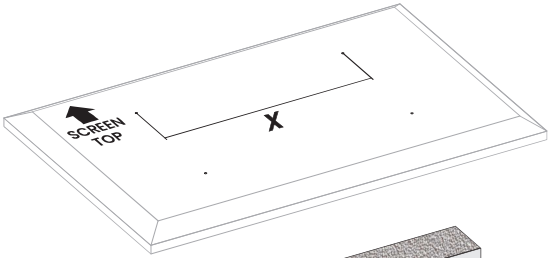

Step 4

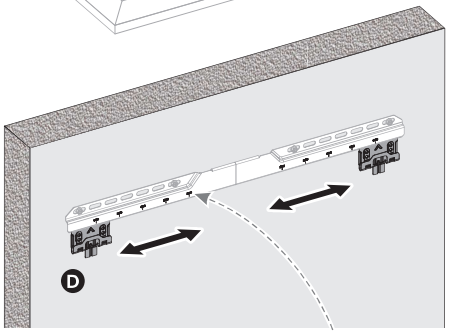

Adjust Hanging Plates to VESA Width

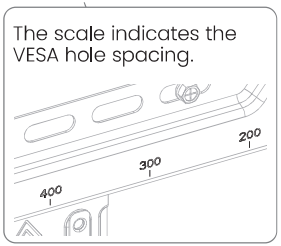

• Slide the Hanging Plates (#D) along the Wall Plates (#A, #B) to match the VESA hole spacing measured in Step 3.

• Use the measurement scale on the Wall Plates to position the Hanging Plates (#D). Align the arrow on each Hanging Plate with the corresponding measurement line to ensure proper centering.

NOTE: The scale on the Wall Plates indicates VESA hole spacing in millimeters (mm). Ensure the selected position matches your TV's VESA measurement.

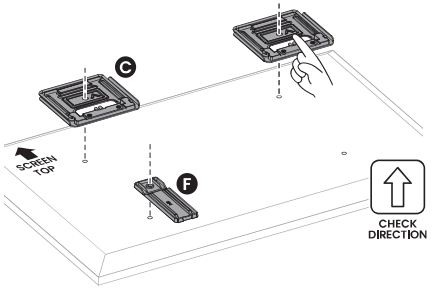

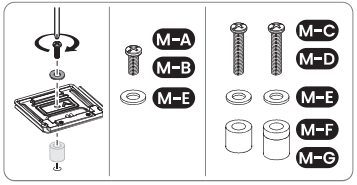

Note: *Adjust the position of Brackets (D) according to the VESA hole spacing on the TV.*

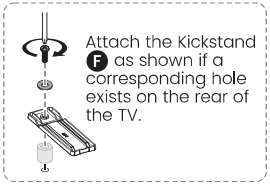

Step 5
Attach VESA Plates and Kickstand

• Select the appropriate size mounting bolts (#M-A, #M-B, #M-C, #M-D) and washers (#M-E) for your TV's mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size, refer to your TV manual or contact the manufacturer.
• Install the VESA Plates (#C) onto the upper mounting holes on the back of the TV in the orientation shown, using the selected bolts and washers. If needed, use the Spacers (#M-F, #M-G) to accommodate curved backs or recessed mounting holes.
• Attach the Kickstand (#F) to one of the lower mounting holes on the back of the TV using appropriate hardware, as shown.
NOTE: Install the Kickstand (#F) on the side of the TV where your HDMI or input ports are located for easier access after installation.

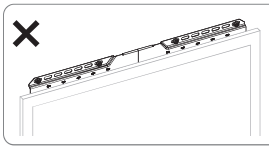

Note: *If the mounting bracket is obstructed during installation, use the supplied bushings to raise the mounting height.*

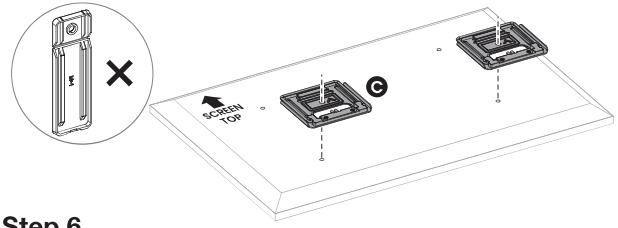

⚠ CAUTION
To ensure a safe installation, please pay close attention to screw selection and installation method:
Always use screws of the correct length and specification as specified in your TV's manual or advised by the manufacturer.
Screws Too Long: *May damage internal components of the TV.*
Screws Too Short: *May fail to secure the TV properly, posing a risk of falling.*
When installing, ***AVOID OVER-TIGHTENING*** *the screws to prevent stripping or damaging the mounting holes.*

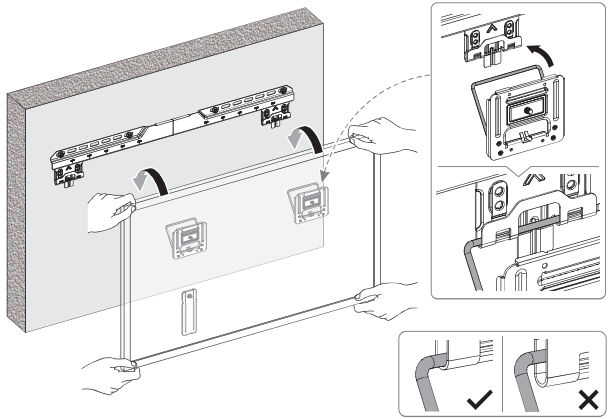

Note: *For TVs 55" and smaller, attach Panel C to the lower two VESA holes if the TV doesn't fully cover the wall plate.*

Step 6
Hang TV onto Wall Mount

• Pull the metal bars on each of the VESA Plates (#C) outward from the TV. Then lift the TV and hook the VESA Plates onto the Hanging Plates (#D). Ensure both VESA Plates (#C) are fully seated into the Hanging Plates (#D).

⚠ CAUTION
Before hanging the TV, make sure the wall plate is securely installed to prevent personal injury or product damage.

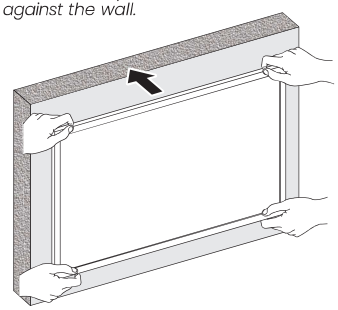

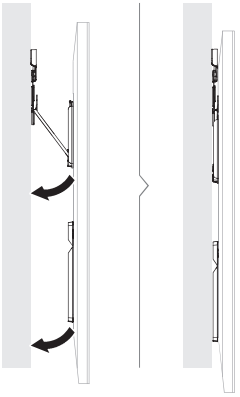

Step 7

Secure TV Against Wall

• Carefully push the TV toward the wall until it sits flush. The metal bars on the VESA Plates (#C) will fold back into place against the back of the TV.

Note: *Carefully lean the TV against the wall.*

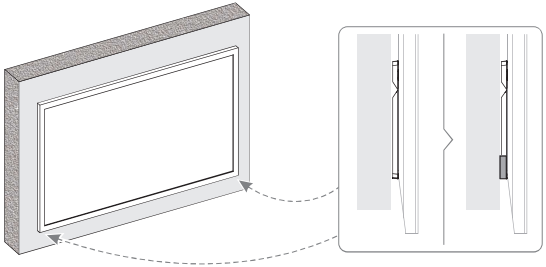

Step 8

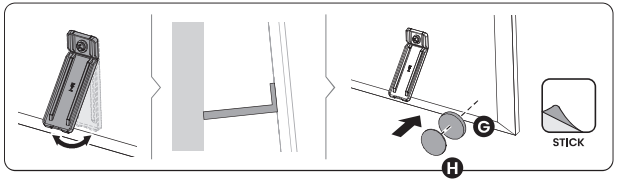

Adjust TV Position and Access Rear

• To access cables or the back of the TV, gently pull the bottom of the TV away from the wall and prop it up using the Kickstand (#F).

• To ensure the TV sits vertically parallel to the wall, attach the Adhesive Pads (#G) or Small Adhesive Pads (#H) to the back of the TV as needed to fill any gap.

NOTE: Apply the appropriate combination of Adhesive Pads (#G, #H) based on the measured distance to achieve a level, flush alignment.

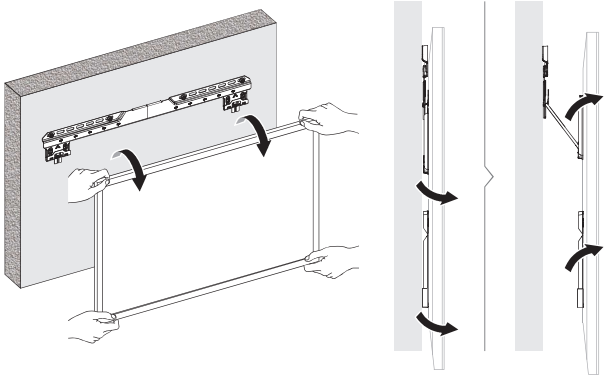

Step 9

Remove TV from Wall Mount

• Pull the bottom of the TV away from the wall to disengage the metal bars on the VESA Plates (#C). Then lift the TV upward to unhook the VESA Plates from the Hanging Plates (#D).
