WARNING: Do not install this product in a manner which will impede your vehicle's safety and operation or that will obstruct the driver's view. Ensure your installation follows all local and national safety requirements. Mount-It! does not assume any liability or responsibility from installation or use resulting in damages, injury, or death.

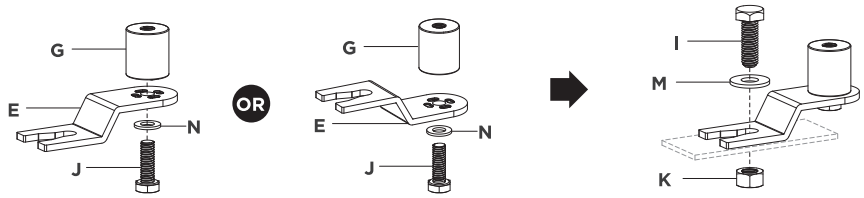

Installation Instructions

There are multiple mounting options available depending on the configurations in your vehicle. Choose the step which best suits your needs from the options below. If compatible you may choose to use the existing seat bolts and hardware in your vehicle as a substitute for the provided hardware.

Step 1a

Horizontal Installation Option (Using Bracket E)

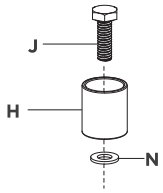

• Determine the orientation that will be required for Horizontal Bracket (#E) and install the Mounting Base (#G) as shown using Washer (#N) and Bolt (#J).
• Loosen or remove the seat mounting bolt in the desired location. Lift the seat and slide the open end of the Horizontal Mounting Bracket under the seat so that it is fully aligned with the hole or seated against the existing bolt. Reinstall the bolt or install Bolt (#I) and Washer (#M) if required and tighten until secure. Nut (#K) will only be required if the installation bolt does not secure directly into a threaded hole.

Step 1b

Direct Bolting into the Vehicle

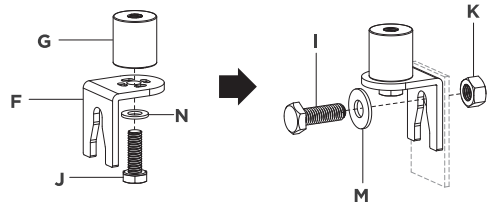

• If your vehicle configuration allows, you may attach the Direct Mounting Base (#H) directly to the seat bolt hole as shown, with Washer (#N) beneath and secured by Bolt (#J) or the existing bolt.

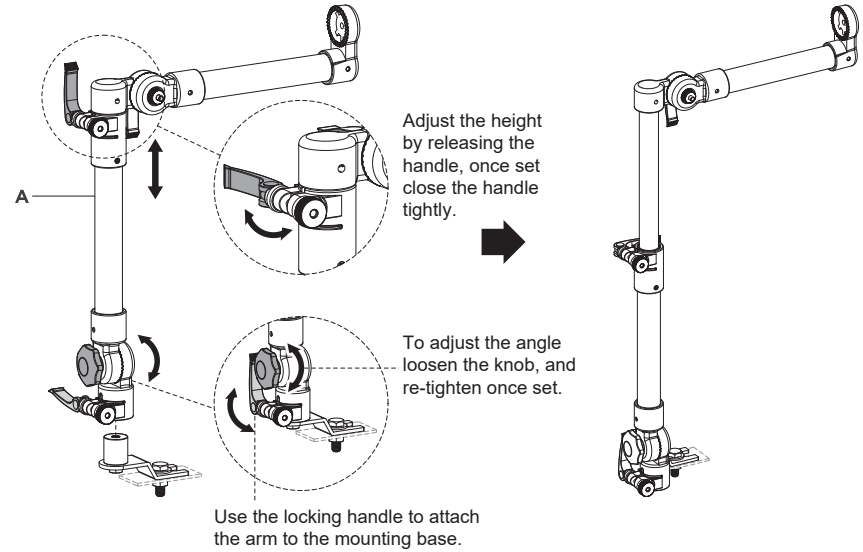

Step 1c

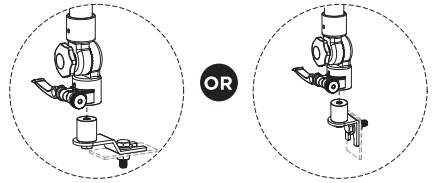

Vertical Installation Option (Using Bracket F)

• For vertical installation (such as on the side of the seat frame or the wall of the vehicle) use Vertical Bracket (#F) and install the Mounting Base (#G) as shown using D8 Washer (#N) and M8x25 Bolt (#J).
• Attach it to the desired bolt hole using Bolt (#I) and Washer (#M) or by using the existing bolt. Nut (#K) will only be required if the installation bolt does not secure directly into a threaded hole.

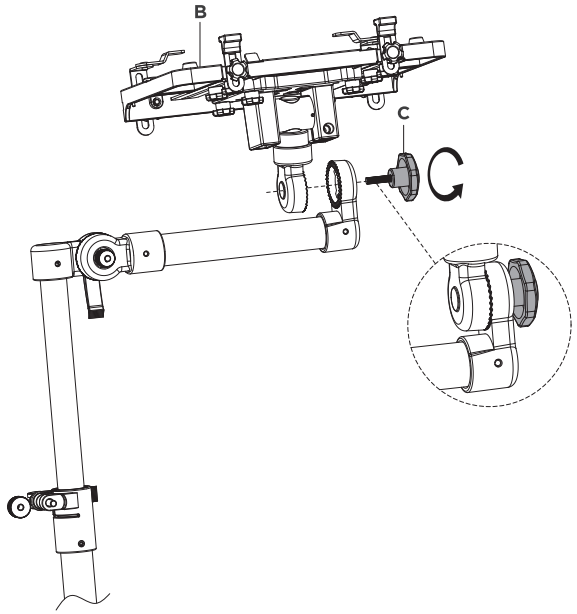

Step 2

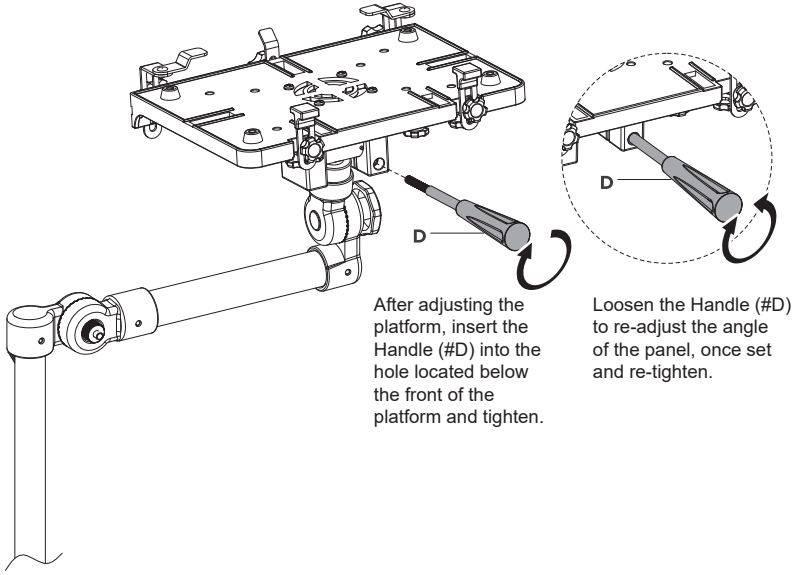

Step 3

• Align the joint on the Laptop Tray to the joint at the end of the Arm Assembly and connect them together using Knob (#C). Adjust the angle of the Laptop Tray by loosening the knob and re-tightening once set.

Step 4

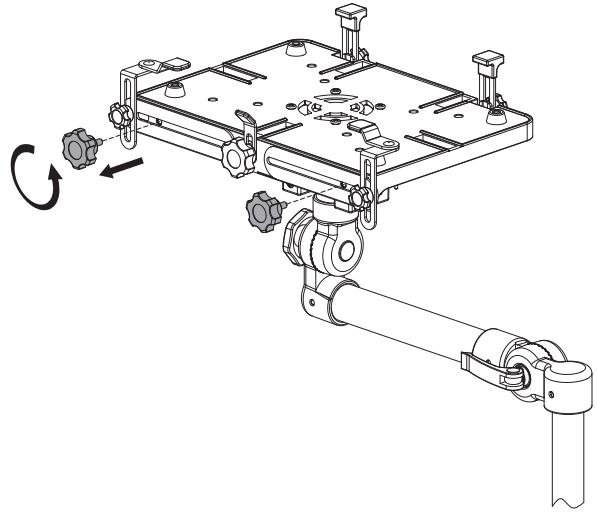

After adjusting the platform, insert the Handle (#D) into the hole located below the front of the platform and tighten.

Loosen the Handle (#D) to re-adjust the angle of the panel, once set and re-tighten.

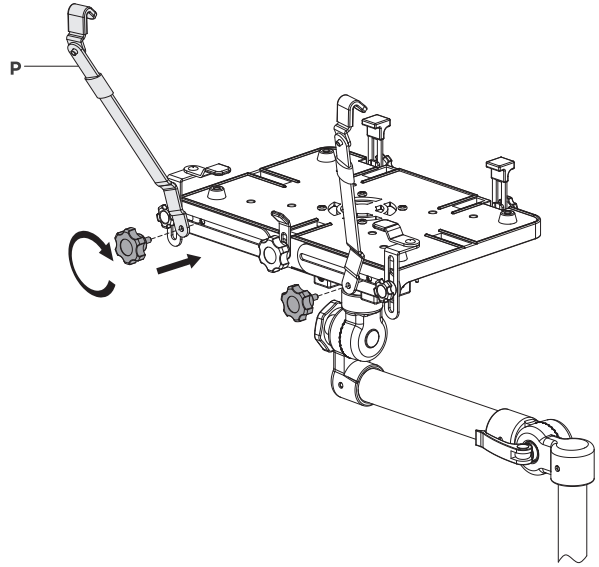

Step 5

• From the rear of the Laptop Tray, temporarily remove two outer the hand knobs.

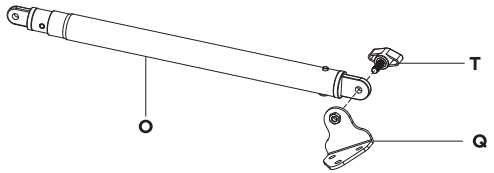

Step 6

• Reattach the hand knobs through the Laptop Screen Supports (#P) as shown here.

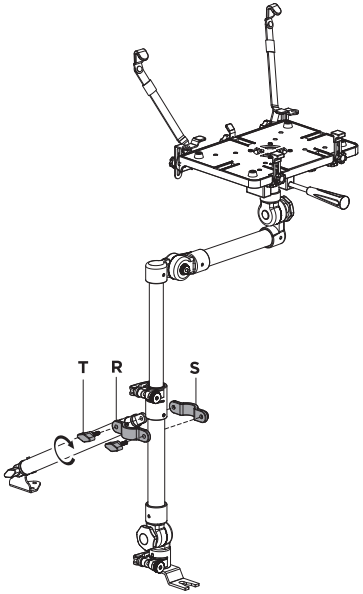

Step 7

• Connect the Stabilizing Arm (#O) to the Stabilizing Arm Base (#Q) using the Bolt (#T) and tighten the bolt by hand only.

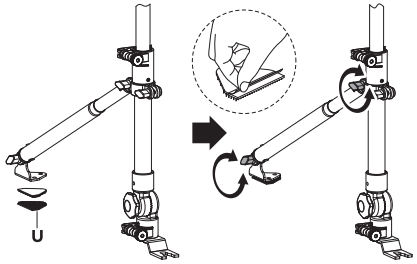

Step 8

• Connect the Stabilizing Arm Assembly to the middle of the laptop arm assembly as shown here, using Stabilizing Arm U-Brackets (#R, #S) and Bolts (#T), tighten by hand only. The bolt hole on the end of the Stabilizing Arm should be placed between the bolt holes on the U-Brackets (#R, #S) with Bolt (T#) passing through and securing all 3 parts.

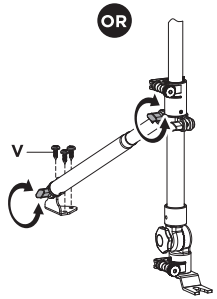

To lengthen or shorten the Stabilizing Arm as needed twist the two ends of the poles until it unlocks. Slide to the appropriate length and twist in the opposite direction to lock it in place.

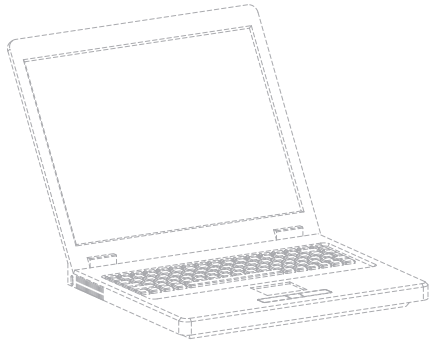

Option 1: The Stabilizing Arm Base can be secured in place using Adhesive Pads (#U) on the end of the bracket. The bracket can be rotated to be secured at a variety of angles.

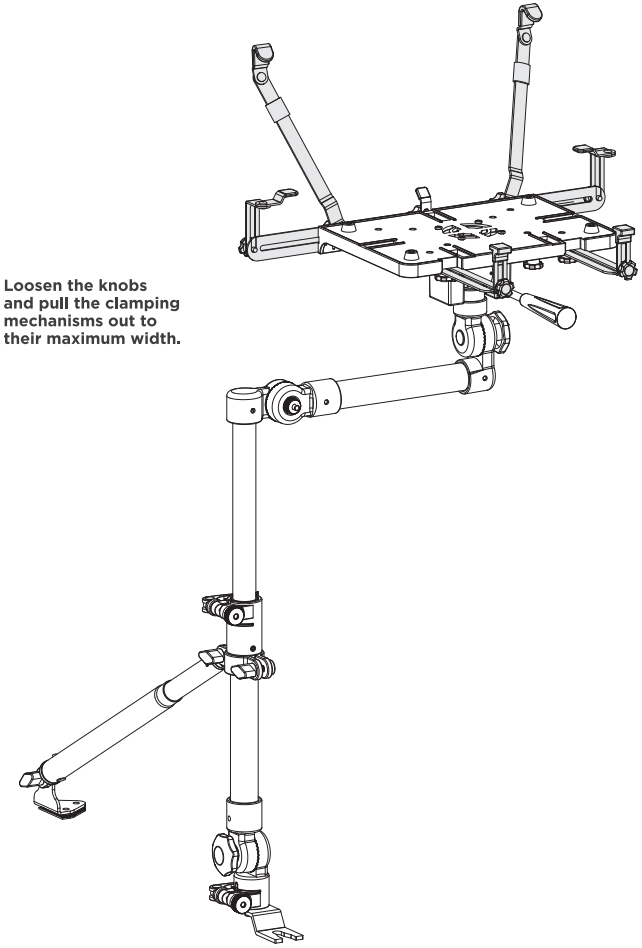

Option 2: The Stabilizing Arm Base can be secured in place using the self-tapping Screws (#V) into any suitable surface such as plastic or similar. Not suitable for installation into metal. The bracket can be rotated to be secured at a variety of angles.

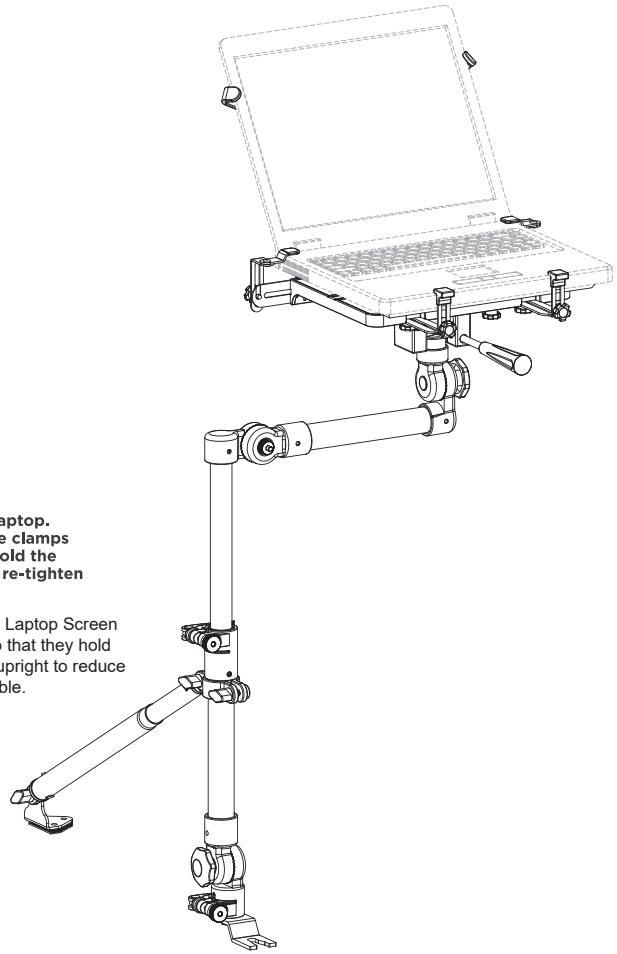

Step 9

Loosen the knobs and pull the clamping mechanisms out to their maximum width.

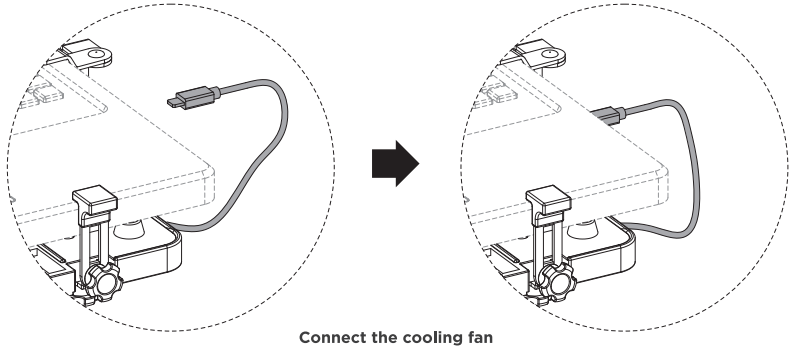

Step 10

Insert the laptop. Position the clamps snugly to hold the laptop and re-tighten the knobs.

Position the Laptop Screen Supports so that they hold the screen upright to reduce screen wobble.
