## DIMENSIONS & WEIGHT CAPACITY

Rated weight capacity is 4,4-19.8lbs for the mount.

### Caution:

Ensure all mounting surfaces are capable of holding the weight of your mount.  
DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY.  
SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!

## Step 1a

### Clamp Mount Option

Connect the Clamp Handle (#C) to the pole base using the Countersunk Bolts (#B).

Place the mount over the edge of the desk in the desired location then tighten the hand knob until the clamp is secured tightly to the desk.

## Step 1b

### Grommet Mounting Option

- To mount through a grommet hole, disassemble the clamp handle and separate the long bolt from the bracket.
- If your desktop has an existing grommet hole between 0.4"–2.4" in diameter, with a desk thickness of 0.4"–1.6" then it is ready for installation.
- If no grommet hole exists in the desktop or not in the required location, then one will need to be drilled. Use a 3/8" (10mm) drill bit to drill a hole through your desktop. The desktop must be between 0.4"–1.6" thick.

- Place the pole over the grommet hole and install the grommet handle with the oval plate through the underside of the desk then tighten the handle until the mount is secure.

## Step 2

### Assemble the Pole

- Twist the Middle Pole (#A2) onto the Lower Pole (#A1) until it stops, then tighten the set screw using the Hex Wrench (#X-1).
- Twist the Upper Pole (#A3) onto the Middle Pole (#A2) until it stops, then tighten the set screw using the Hex Wrench (#X-1).
- Slide the Cable Clip (#D) down to the lower half of the pole.

## Step 3

### Attach the Monitor Brackets

- Align the Monitor Brackets (#G) onto the ends of the Monitor Arms (#B) and secure them in place in the orientation shown here using the Joint Nuts and Bolts (#K, J).

## Step 4

### Monitor Arm Installation

- Slide the Monitor Arm (#B) over the pole, position the arm at the desired height then tighten the bolts on the rear using Hex Wrench (#X-3) until secure.
- Slide the second Cable Clip (#D) onto the pole, followed by the second Monitor Arm (#B) repeating the same process to secure it in place.

## Step 5

### Attach the VESA Mounts to the Monitors

- Select the appropriate size mounting bolt (Select one size #M-A through M-D) and washer (#M-E) for your display's mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size, refer to your display's user manual or contact the manufacturer for sizing information. If necessary use the included Spacer (#M-F) to adjust the length of the bolt. Attach the VESA Plates (#F) using the selected bolts and tighten until secure.

## Step 6

### Attach the Monitor to the Arm

- Slide the VESA plates onto the ends of the monitor arms.
- Install the Thumb Knobs (#H) onto the top of the VESA plates to secure the monitors to the arms.

## Step 7

### Cable Clips

Attach the Cable Clips to the middle of the arm segments.

## Step 8

### Cable Management

Route cables through the clips on the arm, and down through the clips on the pole.

## Step 9

### Final Adjustments

- Loosen or tighten the bolt on the tilting joint to adjust the tension of the tilt.
- The monitor can be swiveled side to side, or rotated 360°.
- Store the Hex Wrenches in the cable clip on the pole for future use.
